Monolithic Linear IC

LA4743B

45 W Four-Channel (Bridge Circuit) Power Amplifier

Overview

The LA4743B is a 45 W 4-channel power amplifier IC for car stereo systems. It features a built-in bridge circuit and the ability to radically reduce the number of external components required. It is also pin compatible with the LA4743A, which differs in the amount of gain provided.

Features

- Maximum output power: 45 W × 4 channels (V_{CC} = 14.4 V, 4 Ω load, 1 kHz)
- 40 W × 4 channels (V_{CC} = 13.7 V, 4 Ω load, 1 kHz)
- Requires only seven external components and does not require an oscillation prevention RC circuit, a noise filter, or a BS capacitor.

Functions

- Muting function
- Built-in standby switch
- Full complement of built-in protection circuits, including protection from shorting to V_{CC}, shorting to ground, load shorting, overvoltages, and overheating.

Specifications

Maximum Ratings at Ta = 25°C

Parameter	Symbol	Conditions	Ratings	Unit
Maximum supply voltage	V _{CC} max1	Signal present	18	V
	V _{CC} max2	No signal (for 1 minute)	26	V
Maximum output current	I _{opeak}		4.5/ch	A
Allowable power dissipation	P _d max	With an arbitrarily large heat sink	50	W
Operating temperature	T _{opr}		-40 to +85	°C
Storage temperature	T _{stg}		-40 to +150	°C
Package thermal resistance	θ _{jc}		1	°C/W

Package Dimensions

unit: mm

■ Any and all SANYO products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your SANYO representative nearest you before using any SANYO products described or contained herein in such applications.

■ SANYO assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO products described or contained herein.

LA4743B

Operating Conditions at $T_a = 25^\circ\text{C}$

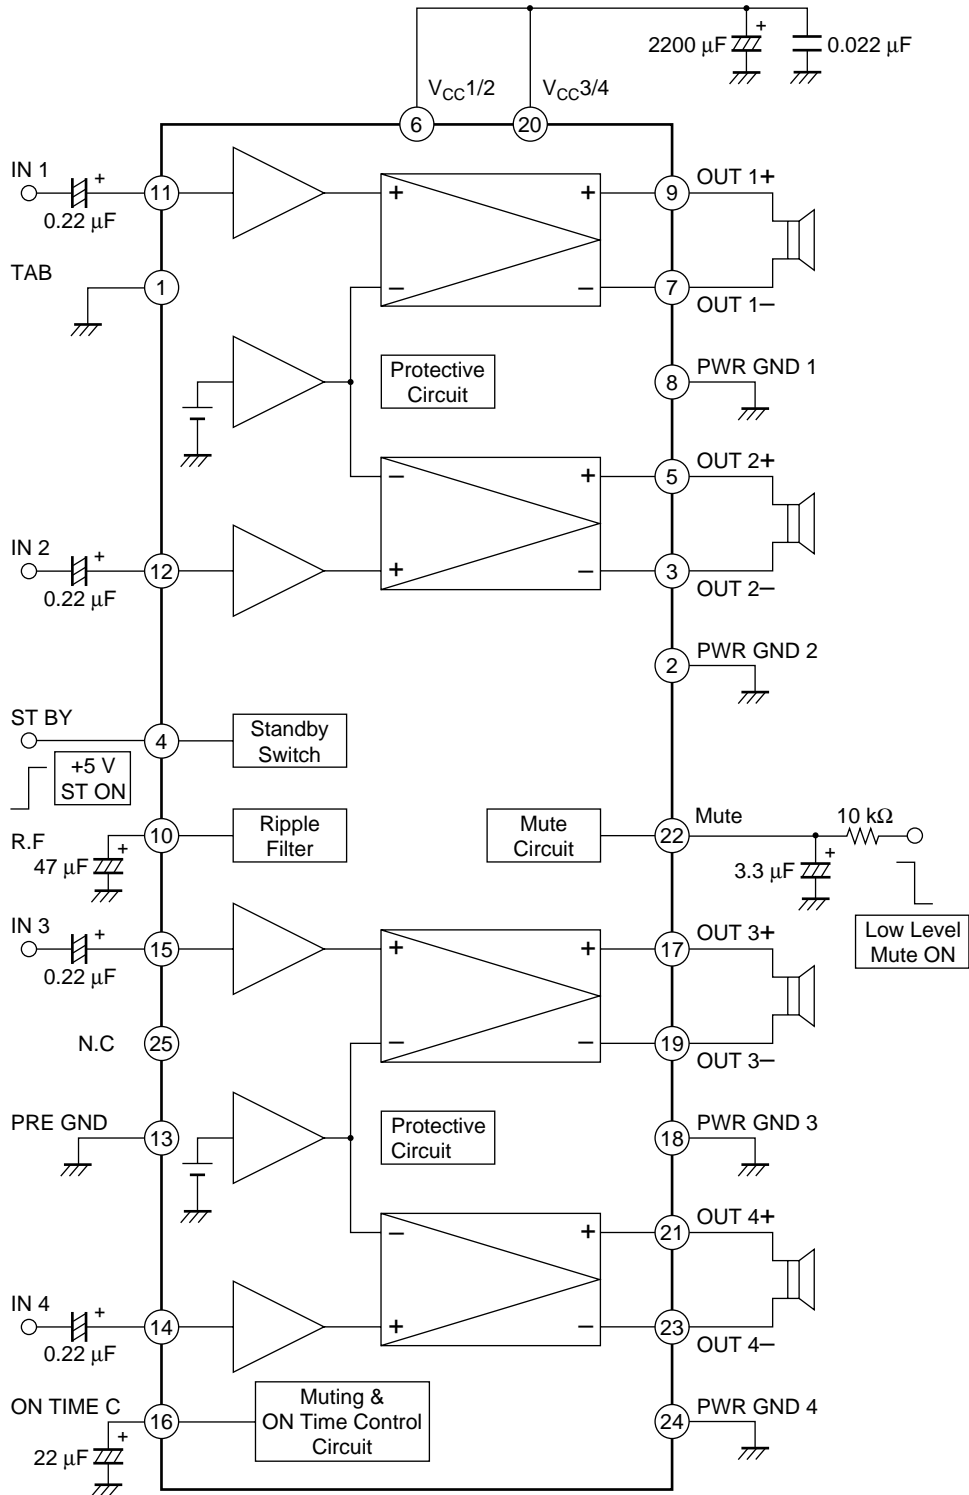

Parameter	Symbol	Conditions	Ratings	Unit
Recommended supply voltage	V_{CC}		14.4	V
Recommended load resistance	R_L		4	Ω
Operating supply voltage range	$V_{CC\ op}$		9 to 18	V

Operating Characteristics at $T_a = 25^\circ\text{C}$, $V_{CC} = 14.4\text{ V}$, $f = 1\text{ kHz}$, $R_L = 4\ \Omega$, $R_g = 600\ \Omega$

Parameter	Symbol	Conditions	Ratings			Unit
			min	typ	max	
Quiescent current	I_{CCO}	$R_L = \infty$, $R_g = 0$	100	200	350	mA
Standby current	I_{st}	$V_{st} = 0\text{ V}$			10	μA
Output offset voltage	$V_{N\text{offset}}$	$R_g = 0$	-150		+150	mV
Voltage gain	VG	$V_O = 0\text{ dBm}$	31	32	33	dB
Voltage gain difference	ΔVG		-1		+1	dB
Output power	P_{O1}	THD = 10 %	23	28		W
	$P_{O\ max1}$	$V_{CC} = 13.7\text{ V}$, $V_{IN} = 5\text{ Vrms}$		40		W
	$P_{O\ max2}$	$V_{IN} = 5\text{ Vrms}$		45		W
Total harmonic distortion	THD	$P_O = 4\text{ W}$		0.1	0.4	%
Channel separation	CHsep	$V_O = 0\text{ dBm}$, $R_g = 10\text{ k}\Omega$	50	60		dB
Ripple rejection ratio	SVRR	$f_r = 100\text{ Hz}$, $V_R = 0\text{ dBm}$, $R_g = 0$	43	50		dB
Output noise voltage	V_{NO}	$R_g = 0$, B.P.F. = 20 Hz to 20 kHz		250	450	μVrms
Muting attenuation	Mute(att)	$V_O = 20\text{ dBm}$	70	80		dB

Notes on Usage and Handling

- Oscillator stabilization time

In some cases, details of the printed circuit board layout may lead to induced parasitic oscillation. This oscillation can be prevented by adding any one of the following components. Verify the optimal values for these capacitors by testing in actual end products.

Technique 1 ... Connect Mylar capacitors (0.1 μF) between the BTL amplifier outputs.

Technique 2 ... Connect an RC circuit (2.2 Ω and 0.1 μF in series) between each output and ground.

- Audio quality (low band)

The low-band frequency characteristics can be improved by adjusting the values of the input capacitors. The recommended value is 2.2 μF .

- Impulse noise

The LA4743B includes a built-in impulse noise suppression circuit. However, further improvement can be achieved by using the muting circuit. When first applying power, activate the muting function at the same time as applying power. Then, after the output DC potential has stabilized, turn off the muting function. When turning off the power, first activate the muting function and then turn off the power. Sample transient responses are attached (see the timing charts).

Transient Responses at Power On

Power on: Standby and muting activated at the same time.

Muting is turned off after the output has stabilized.

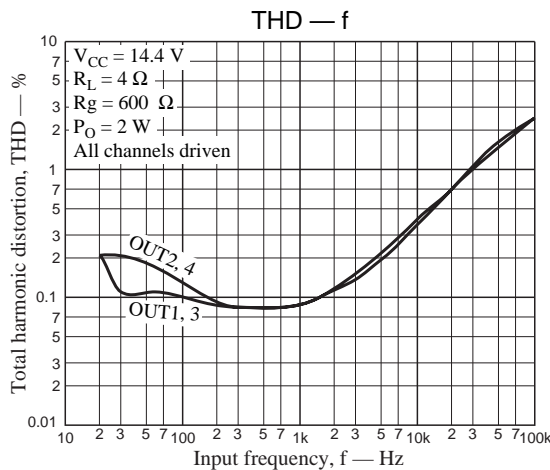

Transient Responses at Power Off

Power off: After activating the muting circuit, turn the power off.

- Specifications of any and all SANYO products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- SANYO Electric Co., Ltd. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all SANYO products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.
