LA7156

Video and Audio Switch for PAL-SECAM 21-Pin Interface

Overview

The LA7156 is a switching IC for use with the PAL and SECAM 21-pin connector interface. The LA7156 integrates video and audio switches in a single chip, and allows significant block reorganization and integration by providing function switching outputs with current limiters, 75 Ω video drivers, muting and other functions. The LA7156 provides a diverse set of functions, including support for single-wire serial bus control that allows complex logic to be handled by microprocessor software.

Functions and Features

- Three audio and three video switching systems
- Audio output and video decoder output muting function
- Video input sync chip clamp
- Two 6 dB video amplifier plus 75 Ω driver systems
- VPS decoder output
- FSS output with current limiting
- 5 V regulator built-in
- Serial control

Switch Logic Values Table

The LA7156 provides the following switching control with control of pin 20.

1. Normal mode (when pin 20 is high)
   In this mode, the LA7156 functions, including switching, FSS output and muting, can be controlled from the six bits of serial data transferred from the microprocessor. However, note that the video and audio system switch operate at the same time in this mode.

DATA1		Switch state	Note
H		A.SW1-A, V.SW1-A	1, 2
L		A.SW1-B, V.SW1-B	1, 2
DATA2	DATA3	Switch state	Note
H	L	A.SW2-A, V.SW2-A	1, 2
L	L	A.SW2-B, V.SW2-B	1, 2
—	H	A.SW2-C, V.SW2-C	1, 2

DATA4	Switch state	Note
H	A.SW3-A, V.SW3-A, pin 7 high	1, 2
L	A.SW3-B, V.SW3-B, pin 7 low	1, 2
DATA5	FSS output state	Note
H	Output high	
L	Output low	
DATA6	Muted state	Note
H	Muted	
L	Mute released	

Note: 1. All the audio switch and the video SW3 outputs are forcibly muted when DATA6 is high or in muting mode.
2. A.SW indicates the audio system switches and V.SW indicates the video system switches.

2. Preset mode (when pin 20 is middle or low)
   This mode uses the LA7156 internally set up logic and the six bits of data are allocated to the VCR operating states to allow the switch states to be changed.
