

# Quad Matched 741-Type Operational Amplifiers

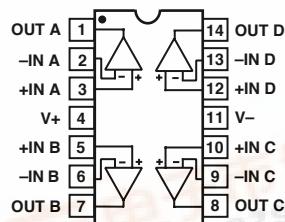

## OP11

### FEATURES

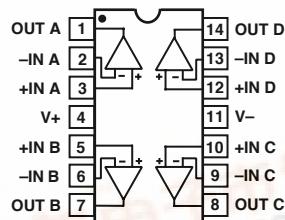

- Guaranteed  $V_{OS}$ : 500  $\mu$ V Max
- Guaranteed Matched CMRR: 94 dB Min
- Guaranteed Matched  $V_{OS}$ : 750  $\mu$ V Max
- LM148/LM348 Direct Replacement
- Low Noise
- Silicon-Nitride Passivation
- Internal Frequency Compensation
- Low Crossover Distortion
- Continuous Short-Circuit Protection
- Low Input Bias Current

### PIN CONFIGURATIONS

14-Lead Epoxy DIP  
(P Suffix)

14-Lead Hermetic DIP  
(Y Suffix)

### GENERAL DESCRIPTION

The OP11 provides four matched 741-type operational amplifiers in a single 14-lead DIP package. The OP11 is pin compatible with the LM148, LM348, RM4156, RM4158, and HA4741 amplifiers. The amplifier is matched for common-mode rejection ratio and offset voltage which is very important in designing instrumentation amplifiers. In addition, the amplifier is designed to have equal positive-going and negative-going slew rates. This is an important consideration for good audio system performance.

The OP11 is ideal for use in designs requiring minimum space and cost while maintaining performance.

## CAUTION

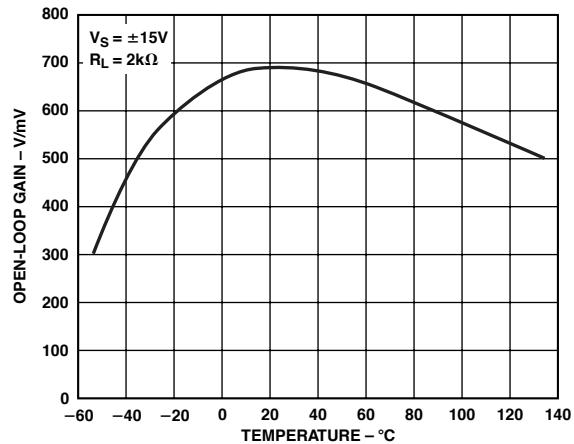

ESD (electrostatic discharge) sensitive device. Electrostatic charges as high as 4000 V readily accumulate on the human body and test equipment and can discharge without detection. Although the OP11 features proprietary ESD protection circuitry, permanent damage may occur on devices subjected to high-energy electrostatic discharges. Therefore, proper ESD precautions are recommended to avoid performance degradation or loss of functionality.
