

# SBLB2030CT AND SBLB2040CT

## SCHOTTKY RECTIFIER

**Reverse Voltage - 30 and 40 Volts      Forward Current - 20.0 Amperes**

### TO-263AB

Dimensions in inches and (millimeters)

### FEATURES

- ◆ Plastic package has Underwriters Laboratory Flammability Classifications 94V-0
- ◆ Metal silicon junction, majority carrier conduction
- ◆ Low power loss, high efficiency
- ◆ High current capability, low forward voltage drop
- ◆ High surge capability
- ◆ For use in low voltage, high frequency inverters, free wheeling, and polarity protection applications
- ◆ Dual rectifier construction, positive center-tap
- ◆ Guardring for overvoltage protection
- ◆ High temperature soldering guaranteed: 250°C/10 seconds, 0.17" (4.3mm) from case

### MECHANICAL DATA

**Case:** JEDEC TO-263AB molded plastic  
**Terminals:** Leads solderable per MIL-STD-750, Method 2026

**Polarity:** As marked

**Mounting Position:** Any

**Mounting Torque:** 5 in. - lbs.max.

**Weight:** 0.08 ounce, 2.24 grams

### MAXIMUM RATINGS AND ELECTRICAL CHARACTERISTICS

Ratings at 25°C ambient temperature unless otherwise specified.

|                                                                                                                            | SYMBOLS         | SBLB2030CT  | SBLB2040CT | UNITS                     |
|----------------------------------------------------------------------------------------------------------------------------|-----------------|-------------|------------|---------------------------|
| Maximum repetitive peak reverse voltage                                                                                    | $V_{RRM}$       | 30          | 40         | Volts                     |
| Maximum RMS voltage                                                                                                        | $V_{RMS}$       | 21          | 28         | Volts                     |
| Maximum DC blocking voltage                                                                                                | $V_{DC}$        | 30          | 40         | Volts                     |
| Maximum average forward rectified current at $T_C=105^\circ\text{C}$                                                       | $I_{(AV)}$      | 20.0        |            | Amps                      |
| Peak forward surge current, 8.3ms single half sine-wave superimposed on rated load (JEDEC Method)                          | $I_{FSM}$       | 175.0       |            | Amps                      |
| Peak repetitive reverse surge current (NOTE 3)                                                                             | $I_{RRM}$       | 1.0         |            | Amp                       |
| Maximum instantaneous forward voltage per leg at 10.0A (NOTE 1)                                                            | $V_F$           | 0.55        |            | Volts                     |
| Maximum instantaneous current at $T_C=25^\circ\text{C}$ rated DC blocking voltage per leg (NOTE 1) $T_C=100^\circ\text{C}$ | $I_R$           | 1.0         | 50.0       | mA                        |
| Typical thermal resistance per leg (NOTE 2)                                                                                | $R_{\theta JC}$ | 2.0         |            | $^\circ\text{C}/\text{W}$ |
| Operating junction and storage temperature range                                                                           | $T_J, T_{STG}$  | -40 to +125 |            | $^\circ\text{C}$          |

#### NOTES:

- (1) Pulse test: 300 $\mu\text{s}$  pulse width, 1% duty cycle
- (2) Thermal resistance from junction to case per leg
- (3) 2.0 $\mu\text{s}$  pulse width,  $f=1.0\text{ KHz}$
