

# SC10XX SERIES

## VOLTAGE REGULATOR

### DESCRIPTION

The SC10XX series is a set of three-terminal low power voltage regulators implemented in CMOS technology. They are available with several fixed output voltages ranging from 1.5V--7.0V. CMOS technology ensures low voltage drop and low quiescent current.

Although designed primarily as fixed voltage regulators, these devices can be used with external components to obtain variable voltages and currents.

The SC10XX is housed in TO-92 package.
