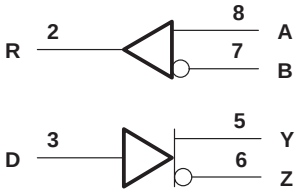
logic diagram (positive logic)



description

The SN65LBC179A and SN75LBC179A differential driver and receiver pairs are monolithic integrated circuits designed for bidirectional data communication over long cables that take on the characteristics of transmission lines. They are balanced, or differential, voltage mode devices that are compatible with ANSI standard TIA/EIA-485-A and ISO 8482:1987(E). The A version offers improved switching performance over its predecessors without sacrificing significantly more power.

The SN65LBC179A and SN75LBC179A combine a differential line driver and differential input line receiver and operate from a single 5-V supply. The driver differential outputs and the receiver differential inputs are connected to separate terminals for full-duplex operation and are designed to present minimum loading to the bus when powered off (V_{CC} = 0). These parts feature a wide positive and negative common-mode voltage range making them suitable for point-to-point or multipoint data bus applications. The devices also provide positive- and negative-current limiting and thermal shutdown for protection from line fault conditions.

The SN65LBC179A is characterized over the industrial temperature range of −40°C to 85°C. The SN75LBC179A is characterized for operation over the commercial temperature range of 0°C to 70°C.

Function Tables

DRIVER

INPUT	OUTPUTS	
D	Y	Z
H	H	L
L	L	H

RECEIVER

DIFFERENTIAL INPUTS A−B	OUTPUT R
$V_{ID} \geq 0.2$ V	H
-0.2 V < V_{ID} < 0.2 V	?
$V_{ID} \leq -0.2$ V	L
Open circuit	H

H = high level, L = low level,
? = indeterminate

† Signaling rate by TIA/EIA-485-A definition restrict transition times to 30% of the bit length, and much higher signaling rates may be achieved without this requirement as displayed in the *TYPICAL CHARACTERISTICS* of this device.

LinBiCMOS is a trademark of Texas Instruments.

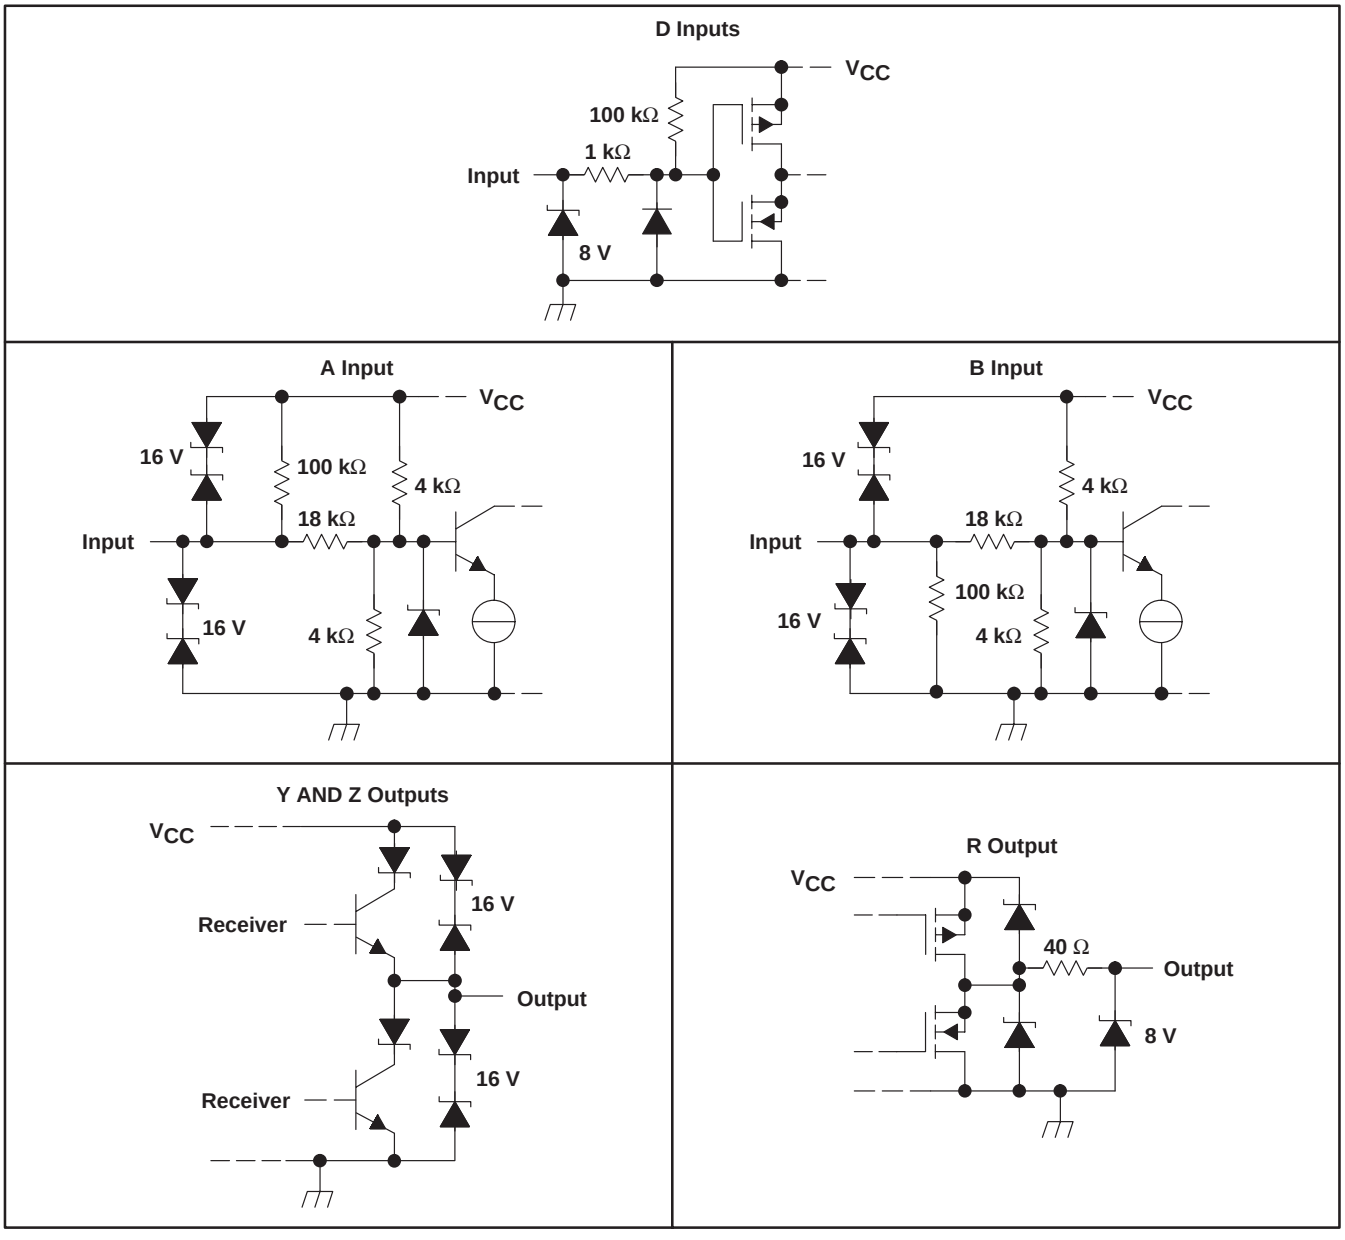
schematics of inputs and outputs



absolute maximum ratings†

Supply voltage range, V_{CC} (see Note 1) . . . . . −0.3 V to 6 V
Voltage range at A, B, Y, or Z (see Note 1) . . . . . −10 V to 15 V
Voltage range at D or R (see Note 1) . . . . . −0.3 V to V_{CC} + 0.5 V
Electrostatic discharge: Bus terminals and GND, Class 3, A: (see Note 2) . . . . . 12 kV
Bus terminals and GND, Class 3, B: (see Note 2) . . . . . 400 V
All terminals, Class 3, A: . . . . . 3 kV
All terminals, Class 3, B: . . . . . 400 V
Continuous total power dissipation (see Note 3) . . . . . Internally limited
Total power dissipation . . . . . See Dissipation Rating Table
Storage temperature range, T_{stg} . . . . . −65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds . . . . . 260°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltage values, except differential I/O bus voltages, are with respect to GND.
2. Tested in accordance with MIL−STD−883C, Method 3015.7
3. The maximum operating junction temperature is internally limited. Uses the dissipation rating table to operate below this temperature.

DISSIPATION RATING TABLE

PACKAGE	$T_A \le 25°C$ POWER RATING	DERATING FACTOR‡ ABOVE $T_A = 25°C$	$T_A = 70°C$ POWER RATING	$T_A = 85°C$ POWER RATING
D	725 mW	5.8 mW/°C	464 mW	377 mW
P	1100 mW	8.08 mW/°C	640 mW	520 mW

‡ This is the inverse of the junction-to-ambient thermal resistance when board-mounted and with no air flow.

recommended operating conditions

		MIN	NOM	MAX	UNIT
Supply voltage, V_{CC}		4.75	5	5.25	V
High-level input voltage, V_{IH}	D	2		V_{CC}	V
Low-level input voltage, V_{IL}	D	0		0.8	V
Differential input voltage, V_{ID} (see Note 4)		−12§		12	V
Voltage at any bus terminal (separately or common-mode), V_O, V_I, or V_{IC}	A, B, Y, or Z	−7		12	V
High-level output current, I_{OH}	Y or Z	−60			mA
	R	−8			
Low-level output current, I_{OL}	Y or Z			60	mA
	R			8	
Operating free-air temperature, T_A	SN65LBC179A	−40		85	°C
	SN75LBC179A	0		70	

§ The algebraic convention, in which the least positive (most negative) limit is designated as minimum, is used in this data sheet.
NOTE 4: Differential input/output bus voltage is measured at the noninverting terminal with respect to the inverting terminal.

driver electrical characteristics over recommended operating conditions (unless otherwise noted)

PARAMETER		TEST CONDITIONS		MIN	TYP†	MAX	UNIT
V_{IK}	Input clamp voltage	I_I = −18 mA		−1.5	−0.8		V
$\|V_{OD}\|$	Differential output voltage	R_L = 54 Ω, See Figure 1	SN65LBC179A	1	1.5	3	V
			SN75LBC179A	1.1	1.5	3	
		R_L = 60 Ω, −7 <$V_{(tot)}$ < 12, See Figure 2	SN65LBC179A	1	1.5	3	
			SN75LBC179A	1.1	1.5	3	
$\Delta\|V_{OD}\|$	Change in magnitude of differential output voltage (see Note 5)	See Figures 1 and 2		−0.2		0.2	V
$V_{OC(SS)}$	Steady-state common-mode output voltage	See Figure 1		1.8	2.4	2.8	V
$\Delta V_{OC(SS)}$	Change in steady-state common-mode output voltage (see Note 5)			−0.1		0.1	V
I_O	Output current with power off	V_{CC} = 0,	V_O = −7 V to 12 V	−10	±1	10	μA
I_{IH}	High-level input current	V_I = 2.V		−100			μA
I_{IL}	Low-level input current	V_I = 0.8 V		−100			μA
I_{OS}	Short-circuit output current	−7 V ≤ V_O ≤ 12 V		−250	±70	250	mA
I_{CC}	Supply current	No load,	V_I = 0 or V_{CC}		8.5	15	mA

† All typical values are at V_{CC} = 5 V, T_A = 25°C.

NOTE 5: $\Delta|V_{OD}|$ and $\Delta|V_{OC}|$ are the changes in the steady-state magnitude of V_{OD} and V_{OC}, respectively, that occur when the input is changed from a high level to a low level.

driver switching characteristics over recommended operating conditions (unless otherwise noted)

PARAMETER		TEST CONDITIONS		MIN	TYP	MAX	UNIT
t_{PLH}	Propagation delay time, low-to-high-level output	R_L = 54 Ω, See Figure 3	C_L = 50 pF,	2	6	12	ns
t_{PHL}	Propagation delay time, high-to-low-level output			2	6	12	ns
$t_{sk(p)}$	Pulse skew ($\|t_{PHL} - t_{PLH}\|$)				0.3	1	ns
t_r	Differential output signal rise time			4	7.5	11	ns
t_f	Differential output signal fall time			4	7.5	11	ns

RECEIVER SECTION

receiver electrical characteristics over recommended operating conditions (unless otherwise noted)

PARAMETER		TEST CONDITIONS		MIN	TYP	MAX	UNIT
V_{IT+}	Positive-going input threshold voltage	I_O = −8 mA				0.2	V
V_{IT-}	Negative-going input threshold voltage	I_O = 8 mA		−0.2			V
V_{hys}	Hysteresis voltage (V_{IT+} − V_{IT-})				50		mV
V_{OH}	High-level output voltage	V_{ID} = 200 mV, I_{OH} = −8 mA, See Figure 1		4	4.9		V
V_{OL}	Low-level output voltage	V_{ID} = −200 mV, I_{OL} = 8 mA, See Figure 1			0.1	0.8	V
I_I	Bus input current	V_{IH} = 12 V, V_{CC} = 5 V	Other input at 0 V		0.4	1	mA
		V_{IH} = 12 V, V_{CC} = 0			0.5	1	
		V_{IH} = −7 V, V_{CC} = 5 V		−0.8	−0.4		
		V_{IH} = −7 V, V_{CC} = 0		−0.8	−0.3		

receiver switching characteristics over recommended operating conditions (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_{PLH}	Propagation delay time, low-to-high-level output	V_{ID} = −1.5 V to 1.5 V, See Figure 4	7	13	20	ns
t_{PHL}	Propagation delay time, high-to-low-level output		7	13	20	ns
$t_{sk(p)}$	Pulse skew (| t_{PLH} − t_{PHL} |)			0.5	1.5	ns
t_r	Rise time, output	See Figure 4		2.1	3.3	ns
t_f	Fall time, output			2.1	3.3	ns

TYPICAL CHARACTERISTICS

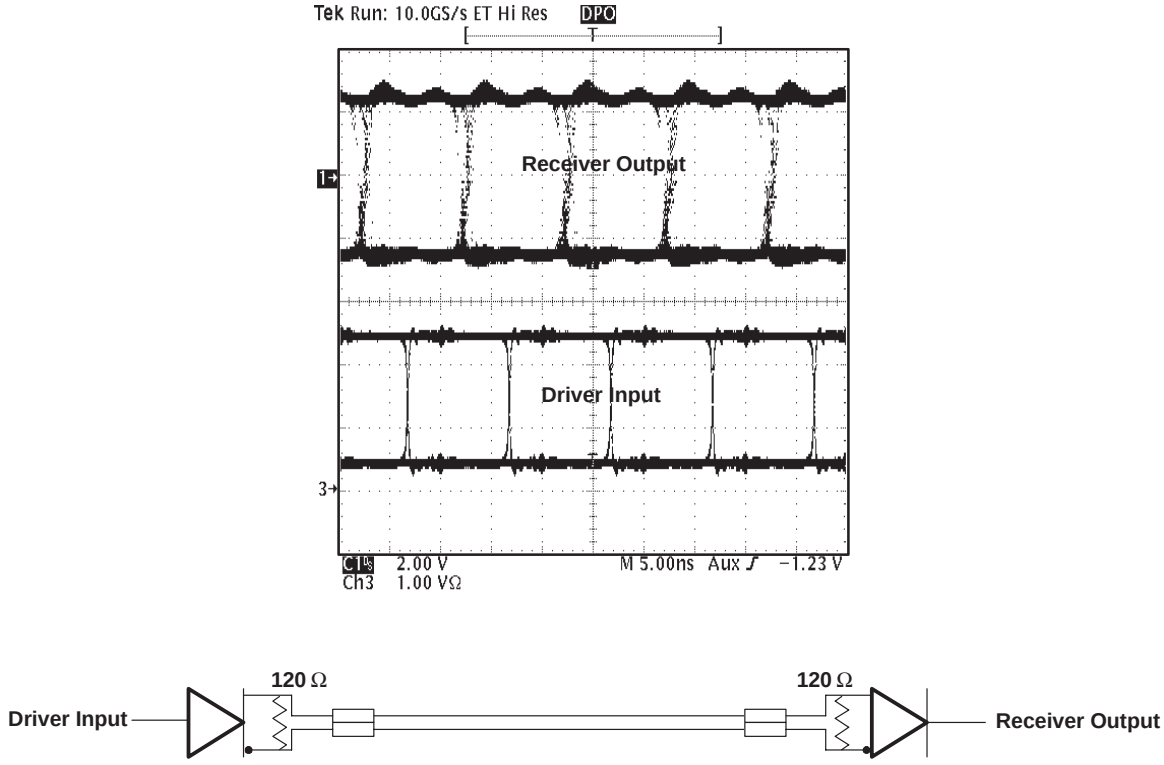

Figure 5. Typical Waveform of Non-Return-To-Zero (NRZ), Pseudorandom Binary Sequence (PRBS) Data at 100 Mbps Through 15m, of CAT 5 Unshielded Twisted Pair (UTP) Cable

TIA/EIA-485-A defines a maximum signaling rate as that in which the transition time of the voltage transition of a logic-state change remains less than or equal to 30% of the bit length. Transition times of greater length perform quite well even though they do not meet the standard by definition.

[1] The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

[2] Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

[3] MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
