

# TL3116, TL3116Y ULTRA-FAST LOW-POWER PRECISION COMPARATORS

SLCS132B – MARCH 1997 – REVISED APRIL 1997

- **Ultra-Fast Operation . . . 10 ns (typ)**
- **Low Positive Supply Current**  
12.7 mA (Typ)
- **Operates From a Single 5-V Supply or From a Split  $\pm 5$ -V Supply**
- **Complementary Outputs**
- **Input Common-Mode Voltage Includes Negative Rail**
- **Low Offset Voltage**
- **No Minimum Slew Rate Requirement**
- **Output Latch Capability**
- **Functional Replacement to the LT1116**

D AND PW PACKAGE  
(TOP VIEW)

## description

The TL3116 is an ultra-fast comparator designed to interface directly to TTL logic while operating from either a single 5-V power supply or dual  $\pm 5$ -V supplies. The input common-mode voltage extends to the negative rail for ground sensing applications. It features extremely tight offset voltage and high gain for precision applications. It has complementary outputs that can be latched using the LATCH ENABLE terminal. Figure 1 shows the positive supply current of the comparator. The TL3116 only requires 12.7 mA (typical) to achieve a propagation delay of 10 ns.

The TL3116 is a pin-for-pin functional replacement for the LT1116 comparator, offering high-speed operation but consuming much less power.

## AVAILABLE OPTIONS

| T <sub>A</sub> | PACKAGED DEVICES               |             | CHIP FORM <sup>‡</sup> (Y) |
|----------------|--------------------------------|-------------|----------------------------|
|                | SMALL OUTLINE <sup>†</sup> (D) | TSSOP (PW)  |                            |
| 0°C to 70°C    | TL3116CD                       | TL3116CPWLE | TL3116Y                    |
| -40°C to 85°C  | TL3116ID                       | TL3116IPWLE | —                          |

<sup>†</sup> The PW packages are available left-ended taped and reeled only.

<sup>‡</sup> Chip forms are tested at T<sub>A</sub> = 25°C only.

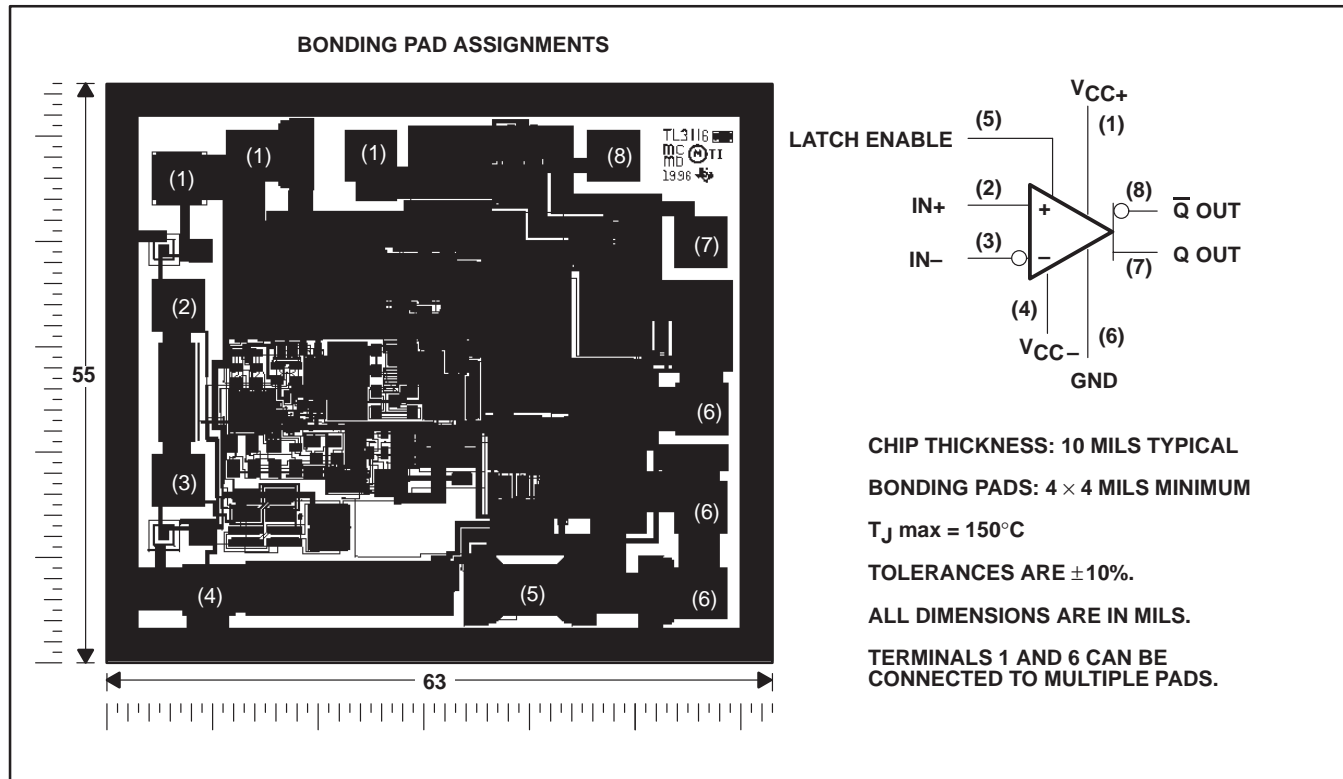

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

# TL3116, TL3116Y ULTRA-FAST LOW-POWER PRECISION COMPARATORS

SLCS132B – MARCH 1997 – REVISED APRIL 1997

## TL3116Y chip information

This chip, when properly assembled, displays characteristics similar to the TL3116C. Thermal compression or ultrasonic bonding may be used on the doped-aluminum bonding pads. Chips may be mounted with conductive epoxy or a gold-silicon preform.

| COMPONENT COUNT |    |
|-----------------|----|
| Bipolars        | 53 |
| MOSFETs         | 49 |
| Resistors       | 46 |
| Capacitors      | 14 |

**absolute maximum ratings over operating free-air temperature range (unless otherwise noted)†**

|  |                              |
|--|------------------------------|
| Supply voltage, $V_{DD}$ (see Note 1)                        | – 7 V to 7 V                 |
| Differential input voltage, $V_{ID}$ (see Note 2)            | 7 V                          |
| Input voltage range, $V_I$                                   | 7 V                          |
| Input voltage, $V_I$ (LATCH ENABLE)                          | 7 V                          |
| Output current, $I_O$  | ± 20 mA                      |
| Continuous total power dissipation                           | See Dissipation Rating Table |
| Operating free-air temperature range, $T_A$                  | –40°C to 85°C                |
| Storage temperature range, $T_{stg}$                         | – 65°C to 150°C              |
| Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds | 260°C                        |

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- NOTES: 1. All voltage values, except differential voltages, are with respect to network ground.  
 2. Differential voltages are at IN+ with respect to IN–.

<sup>†</sup> Full range for the TL3116C is 0°C to 70°C. Full range for the TL3116I is -40°C to 85°C.

<sup>‡</sup>  $t_{pd1}$  cannot be measured in automatic handling equipment with low values of overdrive. The TL3116 is 100% tested with a 1-V step and 500-mV overdrive at  $T_A = 25^\circ\text{C}$  only. Correlation tests have shown that  $t_{pd1}$  limits given can be ensured with this test, if additional dc tests are performed to ensure that all internal bias conditions are correct. For low overdrive conditions,  $V_{OS}$  is added to the overdrive.
