

# N-Channel Dual JFET

## U421 – U426

### FEATURES

- Ultra Low Input Bias Current ..... 250 Fempto Amps
- Low Operating Current
- Tight Matching Characteristics

### APPLICATIONS

- Ultra Low Leakage FET Input Op Amps
- Electrometer
- Infrared Detectors
- pH Meters

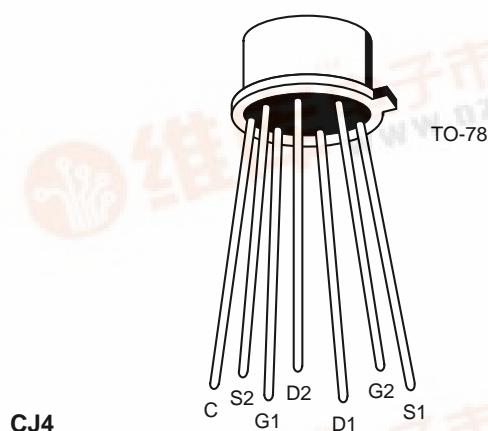

### DESCRIPTION

The Calogic U421 Series are Dual N-Channel JFETs on a monolithic structure designed specifically for very high input impedance for differential amplification and impedance matching. This series features ultra low input bias current (250 femto amps, U421) while offering high gain at low operating currents and tight matching characteristics. These devices are available in chip form for hybrid designs as well as a hermetic TO-78 package.

### ORDERING INFORMATION

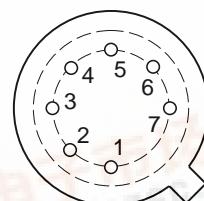

| Part       | Package                  | Temperature Range |
|------------|--------------------------|-------------------|
| U421-U426  | TO-78 Hermetic Package   | -55°C to +150°C   |
| XU421-U426 | Sorted Chips in Carriers | -55°C to +150°C   |

### PIN CONFIGURATION

TO-78

- 1 SOURCE 1
- 2 DRAIN 1
- 3 GATE 1
- 4 CASE/BODY
- 5 SOURCE 2
- 6 DRAIN 2
- 7 GATE 2

BOTTOM VIEW

**ABSOLUTE MAXIMUM RATINGS (T<sub>A</sub> = 25°C unless otherwise noted)**

|   |       |   |
|---|-------|---|
| Gate-to-Gate Voltage.....                             | ±40V  | Total Device Dissipation, T <sub>A</sub> = 25°C |
| Gate-Drain or Gate-Source Voltage .....               | -40V  | (Derate 6.0 mW/ °C to 150°C)..... 750 mW        |
| Gate Current .....                                    | 10mA  | Storage Temperature Range ..... -65°C to +150°C |
| Device Dissipation (Each Side), T <sub>A</sub> = 25°C |       |   |
| (Derate 3.2 mW/ °C to 150°C).....                     | 400mW |   |

**ELECTRICAL CHARACTERISTICS (25°C Unless otherwise noted)**
