Tripp Lite's Isobar is the benchmark by which all other surge suppressors are measured. More than 12 million devoted users rely on an Isobar every day to protect valuable electronic equipment. Now Tripp Lite has taken its surge protection technology a step further by introducing a complete line of satellite-ready surge suppressors that provide more of the features home theater users demand, including extended warranties.

COMPLETE SATELLITE PROTECTION FROM THE LEADER IN PREMIUM SURGE SUPPRESSION

isobar® 6 DBS Premium Surge Suppressor

Now the first name in premium AC surge suppression is also the first name in satellite and coax protection. The Isobar 6 DBS Surge Suppressor safeguards equipment against damaging lightning and surges with the highest protection available—2850 joules!

Comprehensive protection for satellite, cable, antenna and pay-per-view connections eliminate the need for additional suppressors. Premium features such as an all-metal housing, diagnostic LEDs and gold plated coaxial connectors make the Isobar 6 DBS the premium choice for satellite users. \$50,000 Ultimate Lifetime Insurance covers connected equipment against surge damage, including direct lightning strikes... for life!

- 3 exclusive Isolated Filter Banks eliminate interference between connected equipment
- Indestructible all-metal housing won't burn, melt or crack
- Sine wave tracking monitors the waveform of incoming AC power and ensures a consistent level of protection
- Gold-plated coaxial connectors provide superior conductivity
- Highest level of UL-verified joule ratings shields connected equipment from damaging surges
- Advanced power condition warnings alert you to power problems before putting equipment at risk
- 5-Year Expanded Warranty protects the DBS receiver and LNB against damage

Super 10+Tel DBS Surge Suppressor

Tripp Lite's Super Series offers an affordable alternative to the Isobar, and now provides complete surge protection for audio/video equipment. Multi-stage suppression circuitry safeguards connected equipment and filters out harmful EMI/RFI line noise to reduce equipment lock-ups, audio static, video interference and "snow."

Super 10+Tel DBS Surge Suppressors feature 10 outlets, 2 sets of coaxial jacks, as well as phone line jacks to connect and protect an entire system with a single unit. \$50,000 Ultimate Lifetime Insurance covers connected equipment against surge damage, including direct lightning strikes... for life!

- 10 AC outlets provide protection for more equipment than standard competitors' models
- 2 unswitched outlets protect equipment that is constantly on, such as a fax machine, modem or clock
- Extra long 10' power cord is longer than most extension cords
- Advanced power condition warnings alert you to power problems before putting equipment at risk
- 3-Year Expanded Warranty protects the DBS receiver and LNB against damage

Model	AC Receptacles	Cord Length (ft.)	Isolated Filter Banks	Surge Energy Rating (joules)	Surge Current Rating (amps)	Additional Interface Type	Diagnostic LEDs	Ultimate Lifetime Insurance	Dimensions H x W x D (inches)
ISOBAR6DBS	6	6	3	2850	92,000	1 line (RJ11) modem/fax & 2 sets (F) coaxial	3	\$50,000	2½ x 3½ x 9
S10+TEL-DBS	10	10	—	2100	97,000	1 line (RJ11) modem/fax & 2 sets (F) coaxial	3	\$50,000	2 x 3½ x 10¼

ADDITIONAL SATELLITE PROTECTION PRODUCTS

Super 7 Coax Surge Suppressor

Economic surge protection for home electronics: home theater, TV, VCR, stereo or satellite connections.

- 1 set of F-type coaxial connectors protects a single cable line
- 6 AC outlets protect a variety of home theater equipment
- 1200 joules of surge suppression outperform most competitive satellite surge suppressors
- Diagnostic LEDs alert user to power conditions before putting equipment at risk
- \$25,000 Ultimate Lifetime Insurance

Isobar® UltraCoax® Surge Suppressor

Reliable surge suppression with a convenient direct plug-in design to protect a single piece of home theater equipment.

- Durable all-metal housing won't crack or melt
- Diagnostic LEDs alert user to power problems before equipment is put at risk
- Center screw can be fastened to wall outlet to prevent accidental unplugging

Model	AC Receptacles	Cord Length (ft.)	Surge Energy Rating (joules)	Surge Current Rating (amps)	Additional Interface (type)	Diagnostic LEDs	Ultimate Lifetime Insurance	Dimensions H x W x D (inches)
SUPER7COAX	6	7	1200	54,500	1 set (F) coaxial	3	\$25,000	1½ x 2¼ x 11¼
ISOBAR ULTRACOAX	2	—	600	48,000	1 set (F) coaxial	3	\$10,000	4 x 2½ x 2½

DCATV Coax Surge Suppressor

A minor investment in coax protection can provide major reductions in hardware damage.

- Premium connectors have gold-plated contacts to provide superior conductivity
- More surge-absorbing capacity than competitive models
- Up to \$100,000 Ultimate Lifetime Insurance when used in conjunction with most Tripp Lite surge suppressors or UPS systems

Model	Application	Interface Type	Lines Protected
DCATV	Protects coaxial cable lines at TV, VCR connection point	Type F coax	Center & Shield

Tripp Lite Manufactures a Complete Line of Rackmount Power Protection Products

Model: SU1000RT2U

Rackmount UPS Systems provide blackout, brownout and surge protection for rack equipment. 9 models available from 450 VA to 3000 VA featuring line-interactive or on-line operation.

Model: SR44UB

Rack Enclosures organize and secure rackmount equipment. 10 models available in a variety of sizes and styles.

Model: IBAR12ULTRA

Rackmount Surge Suppressors protect rack equipment from damaging surges and spikes. 5 models available with up to 12 outlets.

Model: LCR2400

2400 Watt Rackmount Line Conditioner ensures connected rack equipment receives consistent 120V AC.

Models: PS7217-HW, PS7224, PS4816-NS

Power Strips provide additional outlets wherever they are needed. 10 models available with up to 24 outlets. Includes mounting brackets. Rackmount model also available.
