SCES397A-JULY 2002-REVISED AUGUST 2004

#### **FEATURES**

- Member of the Texas Instruments Widebus™
  Family
- Ideal for Use in PC133 Register DIMM
- Typical Output Skew . . . <250 ps</li>
- $V_{CC}$  = 3.3 V  $\pm$  0.3 V . . . Normal Range
- V<sub>CC</sub> = 2.7 V to 3.6 V . . . Extended Range
- $V_{CC} = 2.5 \text{ V} \pm 0.2 \text{ V}$
- Rail-to-Rail Output Swing for Increased Noise Margin
- Balanced Output Drivers . . . ±18 mA
- Low Switching Noise
- Latch-Up Performance Exceeds 100 mA Per JESD 78, Class II
- ESD Protection Exceeds JESD 22
  - 2000-V Human-Body Model (A114-A)
  - 200-V Machine Model (A115-A)
  - 1000-V Charged-Device Model (C101)

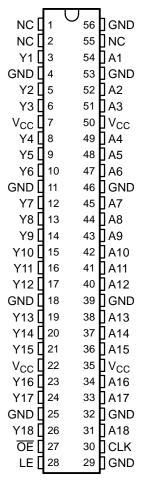

#### **DESCRIPTION/ORDERING INFORMATION**

This 18-bit universal bus driver is designed for 2.3-V to 3.6-V  $V_{CC}$  operation.

Data flow from A to Y is controlled by the output-enable  $(\overline{OE})$  input. The device operates in the transparent mode when the latch-enable (LE) input is high. When LE is low, the A data is latched if the clock (CLK) input is held at a high or low logic level. If LE is low, the A data is stored in the latch/flip-flop on the low-to-high transition of CLK. When  $\overline{OE}$  is high, the outputs are in the high-impedance state.

The SN74ALVCF162835 has series damping resistors in the device output structure that reduce switching noise in 128-MB and 256-MB SDRAM modules. Designed with a drive capability of ±18 mA, this device is a midway drive between the SN74ALVC162835 (±12 mA) and SN74ALVC16835 (±24 mA).

(1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Widebus is a trademark of Texas Instruments.

SCES397A-JULY 2002-REVISED AUGUST 2004

## **DESCRIPTION/ORDERING INFORMATION (CONTINUED)**

The SN74ALVCF162835 is a faster version of the SN74ALVC162835. It is suitable for PC133 applications and, particularly, SDRAM modules clocked at 133 MHz.

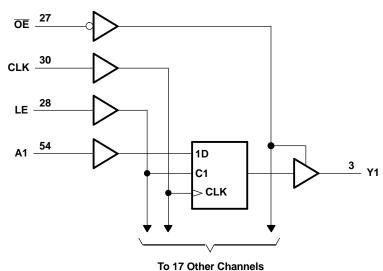

To ensure the high-impedance state during power up or power down,  $\overline{OE}$  should be tied to  $V_{CC}$  through a pullup resistor; the minimum value of the resistor is determined by the current-sinking capability of the driver.

## **FUNCTION TABLE**

	INPUTS							
ŌĒ	LE	CLK	Α	Y				
Н	Х	Х	Х	Z				
L	Н	X	L	L				
L	Н	X	Н	н				
L	L	$\uparrow$	L	L				
L	L	$\uparrow$	Н	н				
L	L	L or H	Χ	Y <sub>0</sub> <sup>(1)</sup>				

 Output level before the indicated steady-state input conditions were established

## **LOGIC DIAGRAM (POSITIVE LOGIC)**

SCES397A-JULY 2002-REVISED AUGUST 2004

## ABSOLUTE MAXIMUM RATINGS(1)

over operating free-air temperature range (unless otherwise noted)

			N	ΛIN	MAX	UNIT
V <sub>CC</sub>	Supply voltage range	Supply voltage range				V
VI	Input voltage range <sup>(2)</sup>		-	0.5	4.6	V
Vo	Output voltage range (2)(3)		-	0.5	V <sub>CC</sub> + 0.5	V
I <sub>IK</sub>	Input clamp current	$V_1 < 0$ or $V_1 < V_{CC}$			-50	mA
I <sub>OK</sub>	Output clamp current	V <sub>O</sub> < 0			-50	mA
Io	Continuous output current	•			±50	mA
	Continuous current through each V <sub>CC</sub> or 0	GND			±100	mA
		DGG package			64	
$\theta_{JA}$	Package thermal impedance (4)	DGV package			48	°C/W
		DL package			56	
T <sub>stg</sub>	Storage temperature range			-65	150	°C

<sup>(1)</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

## **RECOMMENDED OPERATING CONDITIONS(1)**

			MIN	MAX	UNIT	
V <sub>CC</sub>	Supply voltage		2.3	3.6	V	
	High-level input voltage	V <sub>CC</sub> = 2.3 V to 2.7 V	1.7		V	
V <sub>IH</sub>	r light-level input voltage	$V_{CC} = 2.7 \text{ V to } 3.6 \text{ V}$	2		V	
	Low level input voltage	$V_{CC} = 2.3 \text{ V to } 2.7 \text{ V}$		0.7	V	
$V_{IL}$	Low-level input voltage $V_{CC} = 2.7 \text{ V to } 3.6 \text{ V}$			0.8	V	
V <sub>I</sub>	Input voltage		0	$V_{CC}$	V	
Vo	Output voltage		0	$V_{CC}$	V	
		V <sub>CC</sub> = 2.3 V		-6		
	High-level output current	VCC - 2.5 V		-8		
		V - 2.7.V		-6	mA	
I <sub>OH</sub>		$V_{CC} = 2.7 \text{ V}$		-12		
		V <sub>CC</sub> = 3 V		-8		
		v <sub>CC</sub> = 3 v		-18		
		V <sub>CC</sub> = 2.3 V		6		
		V <sub>CC</sub> = 2.3 V		8	3	
	Low level output ourrent	V - 27 V		6	mA	
I <sub>OL</sub>	Low-level output current	$V_{CC} = 2.7 \text{ V}$		12		
		V - 2 V		8		
		V <sub>CC</sub> = 3 V		18		
Δt/Δν	Input transition rise or fall rate			10	ns/V	
T <sub>A</sub>	Operating free-air temperature		-40	85	°C	

<sup>(1)</sup> All unused inputs of the device must be held at V<sub>CC</sub> or GND to ensure proper device operation. Refer to the TI application report, Implications of Slow or Floating CMOS Inputs, literature number SCBA004.

<sup>(2)</sup> The input negative-voltage and output voltage ratings may be exceeded if the input and output current ratings are observed.

<sup>3)</sup> This value is limited to 4.6 V maximum.

<sup>(4)</sup> The package thermal impedance is calculated in accordance with JESD 51-7.

SCES397A-JULY 2002-REVISED AUGUST 2004

## **ELECTRICAL CHARACTERISTICS**

over recommended operating free-air temperature range (unless otherwise noted)

PAR	AMETER	TEST CONDIT	IONS	v <sub>cc</sub>	MIN	TYP <sup>(1)</sup>	MAX	UNIT

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS) or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

**Pb-Free** (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

#### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
