CXA2038R

AFM Monaural Signal Processor for 8 mm VCR

Description

The CXA2038R is a bipolar IC designed as an AFM monaural signal processor for 8 mm VCRs. All functions necessary for AFM monaural are concentrated onto a single 64-pin LQFP.

Features

- Low supply voltage (3.15 V) design
- Low power consumption (Vcc=3.15 V)
 - Recording: 65 mW
 - Playback: 103 mW
- Built-in BPF (1.5 MHz)
- FM modulator center frequency made non-adjusting.
- Supports NTSC and PAL
- Enables both parallel and 3-line serial mode control
- Supports electronic volume (EVR) control

Applications

8 mm VCRs

Structure

Bipolar silicon monolithic IC

64 pin LQFP (Plastic)

Absolute Maximum Ratings (Ta=25 °C)

- Supply voltage Vcc 7 V
- Operating temperature Topr -20 to +75 °C
- Storage temperature Tstg -65 to +150 °C
- Allowable power dissipation

P _D	1120	mW
----------------	------	----

 (When mounted on board)

Operating Conditions

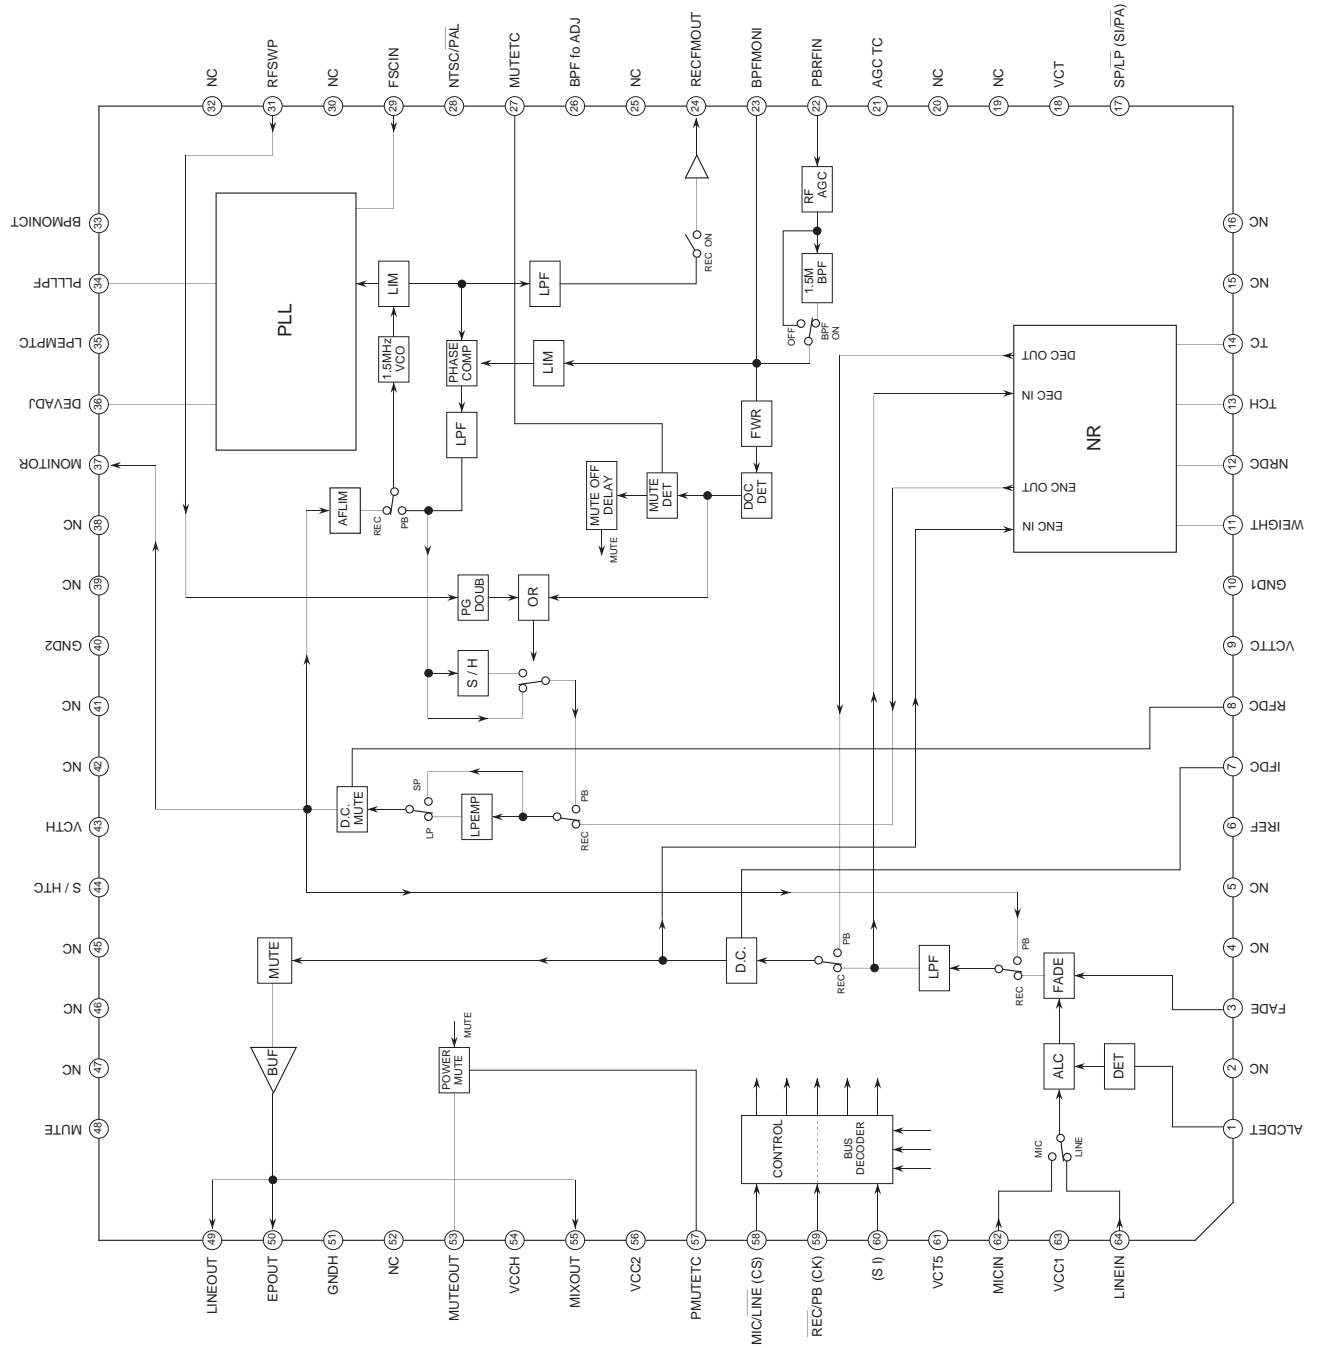

- Recommended supply voltage

Vcc	3.15	V
VccH	4.75	V
- Supply voltage range

Vcc	3 to 5.25	V
VccH	4.5 to 5.25	V

 However, VccH ≥ Vcc

Fig. 3

Adjustment and measurement methods

- DEV adjustment method

Input the reference input (−38 dBm, 1 kHz) to the MIC input and adjust the voltage applied to Pin 36 so that the Pin 24 output reference frequency deflection is 1.5 MHz ±62.8 kHz.

When adjusting DEV, connect a 10 kΩ load resistor between Pin 24 and GND.

- Reference modulation distortion factor

Demodulate the Pin 24 output into the audio signal with the reference demodulator under the same conditions as for DEV adjustment above, then measure the distortion factor.

- BPF f0 adjustment method

Input 15 mVp-p, 1.4 MHz and 1.6 MHz signals to Pin 22 and adjust the voltage applied to Pin 26 so that the 1.4 MHz and 1.6 MHz levels output to Pin 23 are equal.

Note that since adjustment OFF mode results when the Pin 26 voltage is between 0 to 0.8 V, the BPF f0 should be adjusted with the Pin 26 voltage between 1.2 to 3 V (when Vcc1 = 3.15 V). When adjusting the BPF f0, connect a 4.7 kΩ load resistor between Pin 23 and GND.
