

## Description

The MIM-5xx3K2 is miniaturized infrared receivers for remote control and other applications requiring improved ambient light rejection.

The separate PIN diode and preamplifier IC are assembled on a single leadframe.

The epoxy package contains a special IR filter.

This module has excellent performance even in disturbed ambient light applications and provides protection against uncontrolled output pulses.

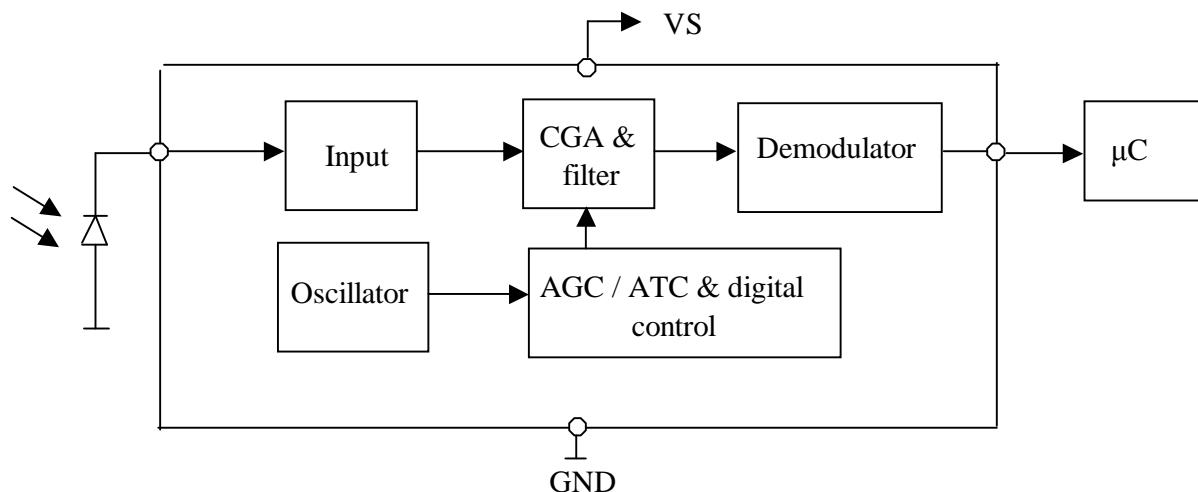

## Features

- | Photo detector and preamplifier in one package
- | Internal filter for PCM frequency
- | High immunity against ambient light
- | Improved shielding against electric field disturbance
- | 5.0-Volt supply voltage; low power consumption
- | TTL and CMOS compatibility

**Reliability**

Test item	Test condition	Standard
High temperature	Ta=+80°C t=240H	Note 2.
High temp. & high humi.	Ta=+40°C 90%RH t=240H	Note 2.
Low temperature	Ta= -10°C t=240H	Note 2.
Temperature cycle	-30°C(0.5H) ~ +80°C(0.5H) 20cycle	Note 2.
Dropping	Test devices shall be dropped 3 times naturally onto hard wooden board from a 75cm height position.	Note 3.

NOTE 1. Distance between emitter & detector specifies maximum distance that output wave form satisfies the standard under the conditions below against the standard transmitter.

- (1) Measuring place ..... Indoor without extreme reflection of light.
- (2) Ambient light source... Detecting surface illumination shall be  $200 \pm 50$ Lux under ordinary hite fluorescense lamp of no high frequency lighting.

(3) Standard transmitter ... Burst wave indicated in Fig 1. of standard transmitter shall be arranged to 50mVp-p under the measuring circuit specified in Fig 2.

NOTE 2. (electro-optical characteristics) shall be satisfied after leaving 2 hours in the normal temperature .

NOTE 3. (electro-optical characteristics) shall be satisfied and no conoid deforms and destructions of appearance .(excepting deforms of terminals)

**Inspection standard**

1. Among electrical characteristics , total number shall be inspected on items blow.

- 1-1 front distance between emitter & detector
- 1-2 Current consumption
- 1-3 H level output voltage
- 1-4 L level output voltage

2. Items except above mentioned are not inspected particularly , but shall fully satisfy

**CAUTION ( When use and storage of this device )**

- 1. Store and use where there is no force causing transformation or change in quality .
- 2. Store and use where there is no corrosive gas or sea(salt) breeze .
- 3. Store and use where there is no extreme humidity .
- 4. Solder the lead-pin within the condition of ratings. After soldering do not add extra force .
- 5. Do not wash this device . Wipe the stains of diode side with a soft cloth. You can use the solvent , ethylalcohol or methylalcohol or isupropylene only .
- 6. To prevent static electricity damage to the Pre-AMP make sure that the human body , the soldering iron is connected to ground before using .
- 7. Put decoupling device between Vcc and GND for reduce the noise from power supply line .
- 8. The performance of remote-control system depends on environments condition and ability of periferal parts. Customer should evaluate the performance as total system in those conditions after system up with components such as commander , micon and this receiver module .

**Others**

- 1. This device is not design to endure radiative rays and heavily charged particles .
- 2. In case where any trouble or questions arise, both parties agree to make full discussion covering the said problem .
