**DC/DC Converter  
P/N 2297845**

## DESCRIPTION

Designed for rugged environments, this power supply can deliver 75 watts of power from a MIL-STD-704D 28 Vdc input.

This pulse width modulated power supply features low output voltage ripple, radiation resistant circuit design, a high efficiency of 80%, ON/OFF inhibit control and optional external synchronization for system use. Together with the use of an external differential filter, the power supply can meet the EMI requirements of MIL-STD-461.

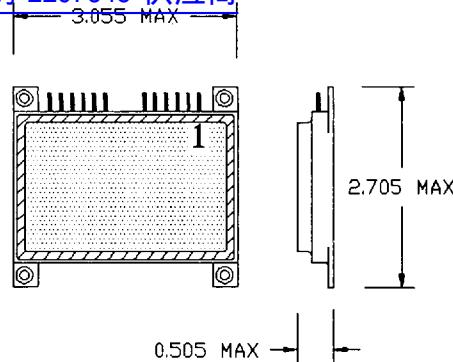

Modular design, certification to MIL-H-38534 and screening to MIL-STD-887 Method 5008 make this 12-pin flat pack hybrid an excellent choice for Military, Avionic (Class "H") and Space (Class "K") applications.

## FEATURES

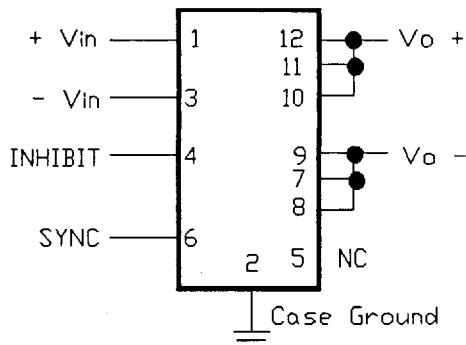

- Single output up to 75 watts
- Available output voltage from 3.0 V to 50 V
- 80% typical efficiency
- Input output isolation
- Indefinite short circuit protection
- Common mode input filter included
- Certification to MIL-H-38534
- Screening to MIL-STD-883
- -55 °C to +125 °C operation
- Optional screens
- Inhibit control
- External synchronization feature
- Radiation tolerant design
- Hermetically sealed
