

General Description

The LR358/358C consists of two independent, high gain and internally frequency compensated operational amplifiers, it is specifically designed to operate from a single power supply. Operation from split power supply is also possible and the low power supply current drain is independent of the magnitude of the power supply voltages.

The LR358/358C series are Compatible with Industry standard 358.

The LR358/358C series are available in standard packages of DIP-8 and SOIC-8.

Features

- Internally Frequency Compensation
- Large Voltage Gain
