Diva LAN ISDN Modem

The multi-user Diva LAN ISDN Modem gives workgroup connectivity, access to the Internet and corporate networks as well as phone and fax support – all in one box!

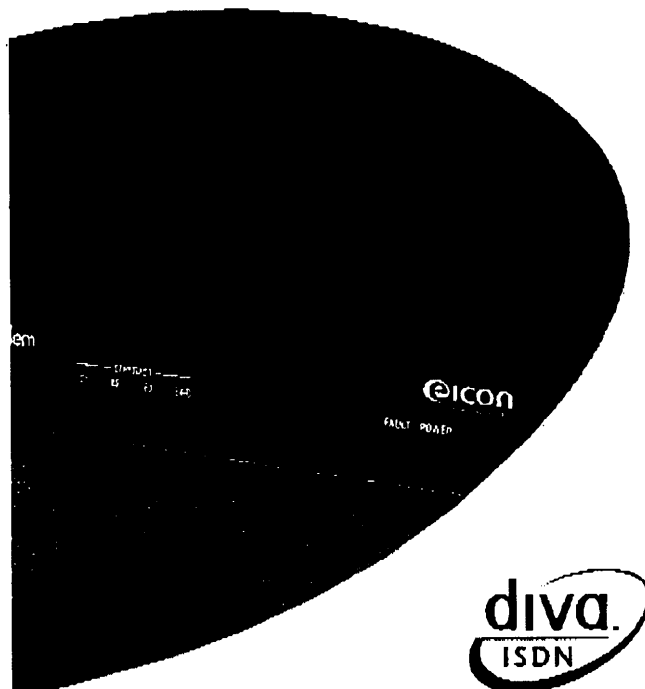

A single ISDN line and one Internet account is all you need to satisfy all your communication needs, saving your business time and money.

The Diva LAN ISDN Modem simultaneously connects everyone in the office or home to the Internet, corporate intranet, to each other and to local resources such as printers and scanners.

It automatically assigns a unique network address to each user, even though everyone shares the same ISP account. Connections are managed automatically on demand, without the bother of dial-up networking.

Designed for non-technical users that don't have support personnel at their disposal, the Diva LAN ISDN Modem installs in minutes and has many user-friendly features.

Complete Communications System for SOHO's and Branch Offices.

Key Benefits

Cost Efficient

Multi-User Diva LAN ISDN Modem

Allows many users to share one Internet account over a single ISDN line – surf all at the same time!

Surf the Net AND Use the Phone or Fax at the Same Time

Eliminating a separate phone line. No more missed phone calls!

Maximise Speed and Reduce ISDN Costs

Brings up the second ISDN B-channel only when needed. Advanced tariff management features use filters to further reduce ISDN costs.

Supports a VPN Over the Internet, Eliminating Long-Distance WAN Charges

The Virtual Private Network feature is made possible with transparent PPTP support, without compromising security. Available on Windows® 9x, Windows® Me, Windows® NT or Windows® 2000 platforms only. NAT provides "stealth firewall" capability to protect your data from Internet intruders.

Easy to Manage

Easy plug and play Installation

Colour-coded cables and ports, easy-to-follow diagrams, Windows Setup Wizard and web-based Configuration Wizard take the guesswork out of installation. The Diva LAN ISDN Modem automatically detects ISDN line information.

Automatic Dial-Up

Launch the Internet browser or e-mail application and you're on-line. No more dial-up networking!

Easy Software Upgrades

Visit our website to download the latest software. A few, simple steps upgrades the Diva LAN ISDN Modem.

Additional Highlights

- On board STAC data compression • Support of a Virtual Private Network over the Internet
- Plug and Play Installation with colour-coded cables and ports • FLASH memory for firmware upgrade
- Setup Wizard & Modem Monitor Software for Windows® 9x, Windows® Me, Windows® NT and Windows® 2000
- Web-based Configurator for any OS platform • Advanced tariff management features
