

## 1x, 2x, 4x, and 8x Clock Multiplier with Internal LCO

### Features

- ◆ Clock Multiplier / Jitter Reduction
  - Generates a Low Jitter 6 - 75 MHz Clock from a Jittery 750 kHz to 30 MHz Clock Source
- ◆ Internal LCO Reference Clock
- ◆ 128 Hz Loop Filter Bandwidth
- ◆ Selectable Multiplication Factors
  - 1x, 2x, 4x, and 8x
- ◆ Output Enable Pin
- ◆ Lock Indicator
- ◆ Minimal Board Space Required
  - No External Analog Loop-filter Components

### General Description

The CS2300-02 is an extremely versatile system clocking device that utilizes a programmable phase lock loop. The CS2300-02 is based on a hybrid analog-digital PLL architecture comprised of a unique combination of a Delta-Sigma Fractional-N Frequency Synthesizer and a Digital PLL. This architecture allows for generation of a low-jitter clock relative to an external noisy synchronization clock with frequencies as low as 750 kHz. The CS2300-02 is a CS2300-OTP device that has been pre-configured at the factory. There are three hardware configuration pins available for mode and feature selection.

### Ordering Information

The CS2300-02 is available in a 10-pin MSOP package in Commercial (-10°C to +70°C) grade. Customer development kits are also available for custom device prototyping and device evaluation. Please see "Ordering Information" on page 2 for complete details.

See the CS2300-OTP datasheet for additional pin description information.

## 2. SPECIFICATIONS

Please see the CS2300-OTP datasheet for package information, device characteristics, and specifications except where noted due to specific programming options.

## 3. OPERATIONAL INFORMATION

Complete operational information can be found in the CS2300-OTP datasheet. Specific operational details dictated by the programming of the CS2300-02 are included below.

- The PLL clock output is forced to 0 when the PLL is unlocked, both upon loss of the CLK\_IN signal or briefly when switching mode pin configurations.
- The minimum loop filter bandwidth once locked is 128 Hz.

## 4. CONFIGURATION INFORMATION

The CS2300-02 has been factory pre-programmed with a unique configuration. The following table outlines the specific configuration profile which can be compared to the CS2300-OTP datasheet for detailed functional descriptions.
