# Dual 2-Wide 2-3-Input OR-AND/OR-AND Gate

The MC10117 is a dual 2-wide 2-3-input OR-AND/OR-AND-Invert gate. This general purpose logic element is designed for use in data control, such as digital multiplexing or data distribution. Pin 9 is common to both gates.

- $P_D = 100 \text{ mW typ/pkg}$  (No Load)
- $t_{pd} = 2.3$  ns typ
- $t_r$ ,  $t_f = 2.2$  ns typ (20%-80%)

\* Inputs 4, 5, 12 and 13 have same I<sub>inH</sub> limit.

Inputs 6, 7, 10 and 11 have same I<sub>inH</sub> limit.

Each MECL 10,000 series circuit has been designed to meet the dc specifications shown in the test table, after thermal equilibium has been established. The circuit is in a test socket or mounted on a printed circuit board and transverse air flow greater than 500 linear fpm is maintained. Outputs are terminated through a 50-ohm resistor to -2.0 volts. Test procedures are shown for only one gate. The other gates are tested in the same manner.
