i The CE logo: what does it stand for?
 The CE logo proves that a product has been designed and manufactured in accordance with the European directives regarding health, safety and the environment. The directive 89/392 states that from the point that a product is brought onto the market, it should be in accordance with the rules of this directive. Machines that meet these regulations will carry the CE logo, together with a small certificate. The member states of the European Union are required to apply this law.
