

POSITIVE VOLTAGE REGULATORS

- OUTPUT CURRENT UP TO 100 mA
- OUTPUT VOLTAGES OF 3.3; 5; 6; 8; 9; 10; 12; 15; 18; 20; 24V
- THERMAL OVERLOAD PROTECTION
- SHORT CIRCUIT PROTECTION
- NO EXTERNAL COMPONENTS ARE REQUIRED
- AVAILABLE IN EITHER $\pm 5\%$ (AC) OR $\pm 10\%$ (C) SELECTION

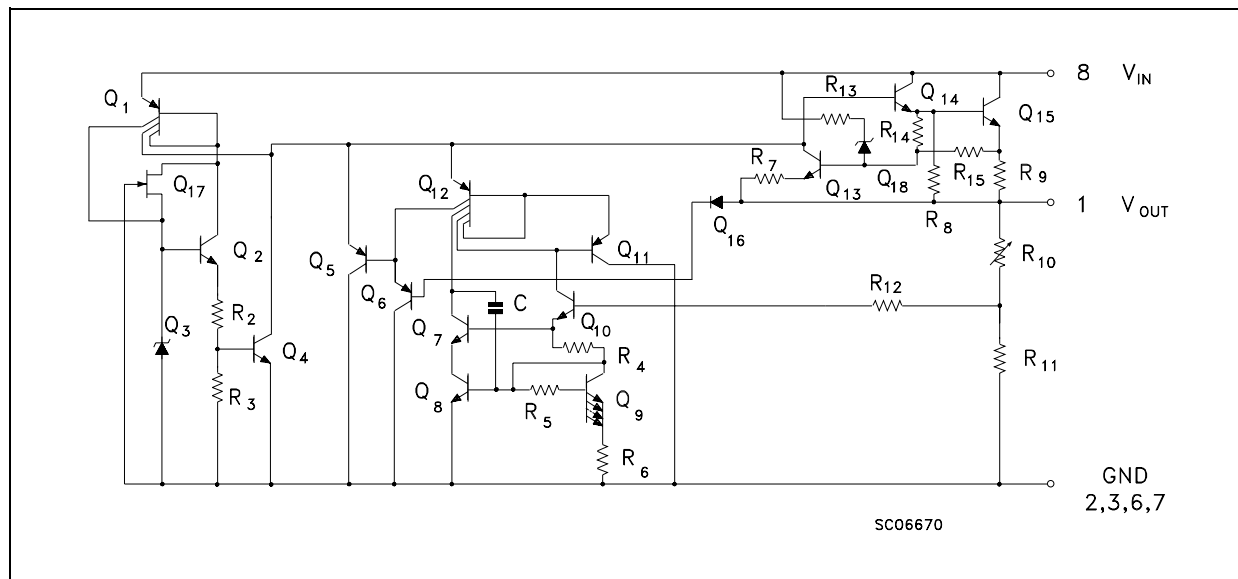

DESCRIPTION

The L78L00 series of three-terminal positive regulators employ internal current limiting and thermal shutdown, making them essentially indestructible. If adequate heat-sink is provided, they can deliver up to 100 mA output current. They are intended as fixed voltage regulators in a wide range of applications including local or on-card regulation for elimination of noise and distribution problems associated with single-point regulation. In addition, they can be used with power pass elements to make high-current voltage regulators. The L78L00 series used as Zener diode/resistor combination replacement, offers an effective output impedance improvement of typically two

orders of magnitude, along with lower quiescent current and lower noise.

SCHEMATIC DIAGRAM

ABSOLUTE MAXIMUM RATINGS

| Symbol | Parameter ² | | Value | Unit |
|------------------|--------------------------------------|-----------------------------|------------------------|------|
| V _I | DC Input Voltage | V _O = 3.3 to 9 V | 30 | V |
| | | V _O = 12 to 15 V | 35 | |
| | | V _O = 18 to 24 V | 40 | |
| I _O | Output Current | | 100 | mA |
| P _{tot} | Power Dissipation | | Internally Limited (*) | |
| T _{stg} | Storage Temperature Range | | -40 to 150 | °C |
| T _{op} | Operating Junction Temperature Range | for L78L00C, L78L00AC | 0 to 125 | °C |
| | | for L78L00AB | -40 to 125 | |

(*) Our SO-8 package used for Voltage Regulators is modified internally to have pins 2, 3, 6 and 7 electrically communed to the die attach flag. This particular frame decreases the total thermal resistance of the package and increases its ability to dissipate power when an appropriate area of copper on the printed circuit board is available for heat-sinking. The external dimensions are the same as for the standard SO-8.

THERMAL DATA

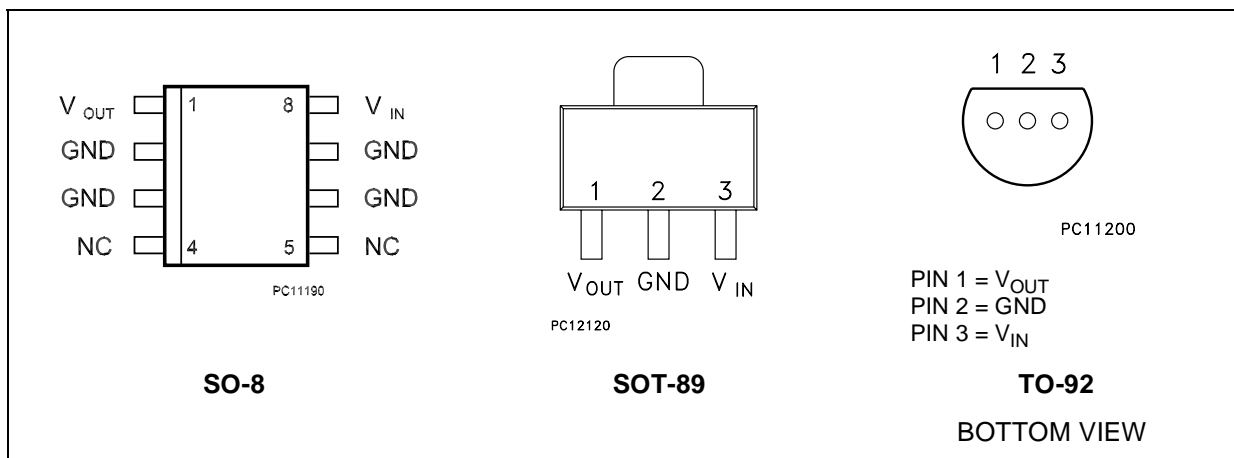

| Symbol | Parameter | | SO-8 | TO-92 | SOT-89 | Unit |
|-----------------------|-------------------------------------|-----|--------|-------|--------|------|
| R _{thj-case} | Thermal Resistance Junction-case | Max | 20 | | 15 | °C/W |
| R _{thj-amb} | Thermal Resistance Junction-ambient | Max | 55 (*) | 200 | | °C/W |

(*) Considering 6 cm² of copper Board heat-sink
