ZIF Connectors

DL/DLM

DL/DLM Product Features

- High pin count:
60, 96, 156, 260, 360, 624, 1248* or 2496* contact positions.
- Variety of contacts:
 - Crimp
 - Square Post
 - Wrap Post
 - Buss
 - PC/RC
- Metal or plastic housing.
- Wide range of accessories.
- Easy actuation by screwdriver, socket wrench (DL1/2/3 only), allen wrench or actuating handle (see accessories page 47).

The long life and rapid mating are achieved through the use of our Zero Insertion Force design. Contacts in the plug and receptacle do not touch each other while the connector halves are being engaged.

Zero Insertion Force Camming Instructions

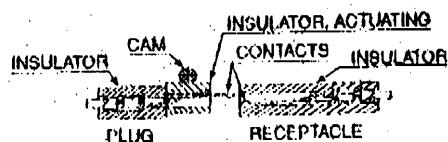

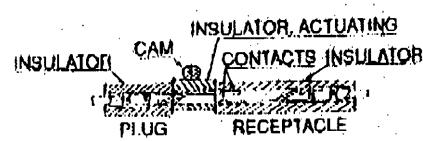

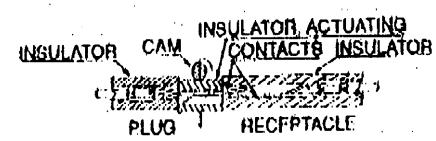

**It's as easy as 1, 2, 3...**

Step 1. The plug is placed over the receptacle.
Step 2. A "quarter turn" of an actuating shaft mates all the contacts at once.

Step 3. The "same quarter" turn also physically locks the connector halves together.

Connector engagement force is zero, and the only wear on the contacts occurs as they are pressed together and lightly wiped past each other during the camming and locking operation.

*Contact Cannon for details.

This is our "DL/DLM" series of connectors.**Step 1.** Simply place it together.**Contacts aligned.****Step 2.** Turn the cam a quarter turn.**Contacts engaged.****Step 3.** It's locked and mated.**Contacts are mated.**

DL/DLM/DLD Performance Specifications

Current Rating 5 A max. - Crimp/Square Post/PCB Contact

4 A max. - PC/RC Contact

10 A, 20 A, 30 A, 40 A, 50 A, 60 A max. - Buss Contact

Dielectric Withstanding Voltage 1200 VAC RMS - Crimp/Square Post Contact

1000 VAC RMS - PC/RC Contact

750 VAC RMS - DL4

Operating Temperature -55°C to 105°C (DL/DLM/DLD)

-55°C to 71°C (DL4)

Durability 10,000 Cycles min. (DL/DLM)

20,000 Cycles min. (DL4)

100,000 Cycles min. (DLD)

Contact Resistance 15 mΩ max. - Crimp/Square Post Contact

20 mΩ max. - Crimp #32 AWG - #30 AWG Contact

30 mΩ max. - PC/RC Contact

Insulation Resistance 5000 MΩ min.

Wire Accommodation #42 AWG - #18 AWG

Contact Spacing 2.54 (.100) Square Grid

Contact Retention: 8 lbs (35,585 N) min.

DL/DLM/DLD

DL/DLM/DLD Temperature/Current Rating

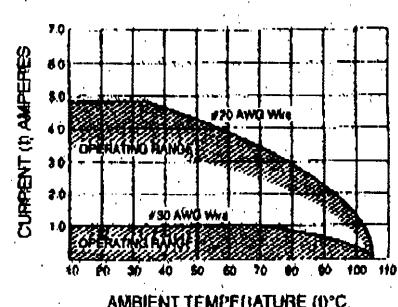

The ambient temperature curves shown represent the rated current carrying capacity of the Cannon DL1/2/3/4, DLM1/2/3 and DLD1/2 electrical connectors, derated to 80% of the values recorded using the methods specified by International Electrotechnical Commission Document 48 (1975).

Current was applied to the total connector (all contacts) in one-half ampere increments and maintained at each current level until thermal stability was achieved. A thermocouple inserted into the "hottest area" of each connector then measured the connector temperature at the same time that an ambient temperature reading was taken. The difference between the two measured values is the heat rise or self-heating created solely by the current flow, and this temperature rise for the current level was deducted from the insulator material rated temperature. These values were then derated to 80% to obtain the curves shown.

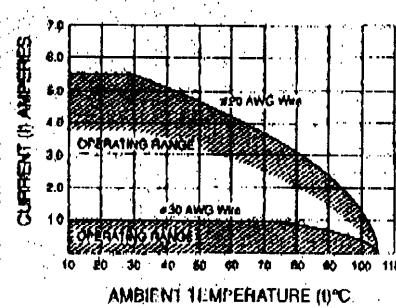

DL1/DLM1/DLD1
