

STAR – Ball Rail Systems Runner Blocks, Steel Version

Runner block 1622-

Slimline

Special versions:

Runner blocks in accuracy class N (clearance and preload 0.02 C) are also available:

- with zinc-iron coating and yellow chromating (part numbers 16...-4-30),
- with low friction seals (part numbers 16...-4-11).

Size 15 to 35 in accuracy class H (clearance and preload 0.02 C) also available as low noise runner blocks with spacer balls.

Dynamic load capacities and moments are reduced by 35%. (Part numbers 1622-...-3-12)

Part numbers

* 30% higher dynamic load capacities on request

Note on dynamic load capacities and moments (see table)

Determination of dynamic load capacities and moments is based on a travel life of 100,000 m.

For comparison with the 50,000 m travel sometimes applied for rail-type guideways, the figures for C , M_x and M_y in the table should be multiplied by 1.26.

Size	Dimensions (mm)
