

This flyback transformer was developed specifically for ON Semiconductor's isolated 2 W Bias Supply using the NCP1030, and is specified in Application Note AND8119/D. It is ideal for 48 V telecom and 42 V automotive applications.
It features interleaved primary and secondary windings to
minimize leakage inductance. It is designed for 35-76 V input. Isolation is 500 Vrms between the primary and secondary windings and between windings and the core.
To request free evaluation samples, contact Coilcraft or visit www.coilcraft.com.

1. When ordering, specify a packaging code:

## B0226-ELD

Packaging: $\mathbf{D}=13^{\prime \prime}$ machine ready reel. EIA-481 embossed plastic tape (600 per full reel).
$\mathbf{B}=$ Less than full reel. In tape, but not machine ready. To have a leader and trailer added (\$25 charge), use code letter D instead.
2. Inductance is for the primary, measured at $275 \mathrm{kHz}, 0.5 \mathrm{Vrms}$.
3. Peak primary current drawn at minimum input voltage.
4. Leakage inductance is for the primary winding with the secondary windings shorted.
5. Operating temperature range $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.
6. Electrical specifications at $25^{\circ} \mathrm{C}$.

 Land Pattern

Weight: $\quad 0.96 \mathrm{~g}$
Terminations: Tin-silver over nickel over tin over phos bronze
Tape and reel: 600/13" reel 24 mm tape width
For packaging data see Tape and Reel Specifications section.
