# 74ABT240

## Octal Buffer/Line Driver with 3-STATE Outputs

### General Description

The ABT240 is an inverting octal buffer and line driver designed to be employed as a memory address driver, clock driver and bus oriented transmitter or receiver which provides improved PC board density.

### Features

- Output sink capability of 64 mA, source capability of 32 mA
- Guaranteed latchup protection
- High impedance glitch free bus loading during entire power up and power down cycle
- Nondestructive hot insertion capability

### Ordering Code:

| Order Number | Package Number | Package Description                                                             |
|--------------|----------------|---------------------------------------------------------------------------------|
| 74ABT240CSC  | M20B           | 20-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-013, 0.300" Wide Body |
| 74ABT240CSJ  | M20D           | 20-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide                   |
| 74ABT240CMSA | MSA20          | 20-Lead Shrink Small Outline Package (SSOP), EIAJ TYPE II, 5.3mm Wide           |
| 74ABT240CMTC | MTC20          | 20-Lead Thin Shrink Small Outline Package (TSSOP), JEDEC MO-153, 4.4mm Wide     |

Device also available in Tape and Reel. Specify by appending suffix letter "X" to the ordering code.

### Connection Diagram

### Pin Descriptions

| Pin Names                          | Description                  |
|------------------------------------|------------------------------|
| $\overline{OE}_1, \overline{OE}_2$ | 3-STATE Output Enable Inputs |
| $I_0-I_7$                          | Inputs                       |
| $\overline{O}_0-\overline{O}_7$    | Outputs                      |

### Truth Tables

| Inputs            |       | Outputs<br>(Pins 12, 14, 16, 18) |
|-------------------|-------|----------------------------------|
| $\overline{OE}_1$ | $I_n$ |                                  |
| L                 | L     | H                                |
| L                 | H     | L                                |
| H                 | X     | Z                                |

| Inputs            |       | Outputs<br>(Pins 3, 5, 7, 9) |
|-------------------|-------|------------------------------|
| $\overline{OE}_2$ | $I_n$ |                              |
| L                 | L     | H                            |
| L                 | H     | L                            |
| H                 | X     | Z                            |

H = HIGH Voltage Level  
L = LOW Voltage Level  
X = Immaterial  
Z = High Impedance

### Absolute Maximum Ratings (Note 1)

|                                                                        |                                      |
|------------------------------------------------------------------------|--------------------------------------|
| Storage Temperature                                                    | –65°C to +150°C                      |
| Junction Temperature under Bias                                        | –55°C to +150°C                      |
| V <sub>CC</sub> Pin Potential to Ground Pin                            | –0.5V to +7.0V                       |
| Input Voltage (Note 2)                                                 | –0.5V to +7.0V                       |
| Input Current (Note 2)                                                 | –30 mA to +5.0 mA                    |
| Voltage Applied to Any Output<br>in the Disabled or<br>Power-Off State | –0.5V to 5.5V                        |
| in the HIGH State                                                      | –0.5V to V <sub>CC</sub>             |
| Current Applied to Output<br>in LOW State (Max)                        | twice the rated I <sub>OL</sub> (mA) |
| DC Latchup Source Current<br>(Across Comm Operating Range)             | –150 mA                              |
| Over Voltage Latchup (I/O)                                             | 10V                                  |

### Recommended Operating Conditions

|                                                 |                |
|-------------------------------------------------|----------------|
| Free Air Ambient Temperature                    | –40°C to +85°C |
| Supply Voltage                                  | +4.5V to +5.5V |
| Minimum Input Edge Rate ( $\Delta V/\Delta t$ ) |                |
| Data Input                                      | 50 mV/ns       |
| Enable Input                                    | 20 mV/ns       |

**Note 1:** Absolute maximum ratings are values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

**Note 2:** Either voltage limit or current limit is sufficient to protect inputs.

### DC Electrical Characteristics

| Symbol           | Parameter                         | Min  | Typ | Max  | Units | V <sub>CC</sub> | Conditions                                                                       |

ALL LEAD TIPS

Technical drawing of a 1/2-13 UNF-2A hex bolt and hex nut. The drawing includes the following dimensions and specifications:

- ALL LEAD TIPS**: Detail of the lead tip with a radius of 0.1 C and a maximum height of 2.1 MAX.
- Hex Bolt Dimensions**:
  - Head width across flats: 1.27 TYP
  - Head height: 1.8 ± 0.1
  - Thread length: 0.35-0.51
- Hex Nut Dimensions**:
  - Height: 0.15 ± 0.05
  - Thread length: 0.35-0.51
- Material and Finish**: 304 stainless steel (A2-70), indicated by the symbol  $\oplus$  0.12 M C A.

SEE DETAIL A

0.15-0.25

A. CONFORMS TO EIAJ EDR-7320 REGISTRATION,  
ESTABLISHED IN DECEMBER, 1998.

B. DIMENSIONS ARE IN MILLIMETERS.

C. DIMENSIONS ARE EXCLUSIVE OF BURRS, MOLD  
FLASH, AND TIE BAR EXTRUSIONS.

Figure 1 is a schematic diagram of the test specimen. It shows a cross-section of a specimen with a central cylindrical body and a flange. Key features include: a 7° taper on the top surface, a 0°-8° taper on the bottom surface, a gage plane at the top of the central body, and a seating plane at the base of the central body. Dimensions include a total length of  $0.60 \pm 0.15$ , a central body length of 1.25, and a gage plane thickness of 0.25.

**20-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide  
Package Number M20D**

**Physical Dimensions** inches (millimeters) unless otherwise noted (Continued)

**20-Lead Shrink Small Outline Package (SSOP), EIAJ TYPE II, 5.3mm Wide  
Package Number MSA20**

Fairchild does not assume any responsibility for use of any circuitry described, no circuit patent licenses are implied and Fairchild reserves the right at any time without notice to change said circuitry and specifications.

#### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
