## Battery Connector

**Molex offers Battery Connectors for mobile applications.**

In mobile applications, battery efficiency plays an important part in the utilization time of the device. Proper battery contact, efficient electrical properties, physical size of connector are some of the major design considerations.

Working together with major customers in the mobile device markets, Molex has developed a comprehensive range of battery connectors that addresses most of these applications design concerns. With working heights of 1.50mm to 5.50mm and circuit sizes of 2 to 5, Molex's battery connectors brings forth flexibility in design solutions for the customers.

47204

47274

47280

48232

Features	Benefits
• Stable normal force	• Secure contact
• Various configurations and contact heights	• Meets specific application needs
• High number of mating cycles	• Meets requirements of most demanding users
• Overall small size	• Meets tight-packaging needs

## SPECIFICATIONS

### Reference Information

Packaging: Refer to order table

UL File No.:

CSA File No.:

Mates With:

Designed In:mm

### Electrical

Voltage: Refer to order table

Current: Refer to order table

Contact Resistance: Refer to order table

Dielectric Withstanding Voltage: Refer to order table

Insulation Resistance: Refer to order table

### Mechanical

Contact Insertion Force:

47182, 47274, 47204 : 1.02N (0.67lb)

Durability: Refer to order table

### Physical

Housing: Thermoplastic, JL 94V-0

Contact:

47182, 47204, 47274, 48232 Copper (Cu)

Alloy

47280 Beryllium Copper (BeCu)

### Plating:

Contact Area — Refer to order table

Underplating — Nickel (Ni)

Operating Temperature: Refer to order table
