[查询"MK21M-1A66B-500W"供应商](#)

DESCRIPTION

MK21 sensors are magnetically operated Reed proximity switches designed for screw mounting. The sensor should be mounted on a fixed surface with the actuating magnet on the moving surface. Introduction or removal of the magnetic field determines the closing and opening of the Reed Switch. Leads are teflon coated. Designed for extreme environment. Resistant to water, fuels, oils, inks and most acids.

APPLICATIONS

- **Position and limit switch**
Pneumatic or hydraulic actuator position
- **End motion detection for linear drive**
Indication and end travel limit switch
- **Machine industry**
End motion detection and door/flap control

FEATURES

- High power switches available
- Designed for high temperature up to 160 °C (molded version)
- Four operate sensitivities available
- A choice of cable terminations and lengths are available
- Molded and potted versions available

DIMENSIONS

All dimensions in mm [inches]
