

**DYMO 6000...
... the best machine
you can buy!**

The Dymo 6000's advanced high spec functions are truly revolutionary. It is not just a new machine. It's the next generation!

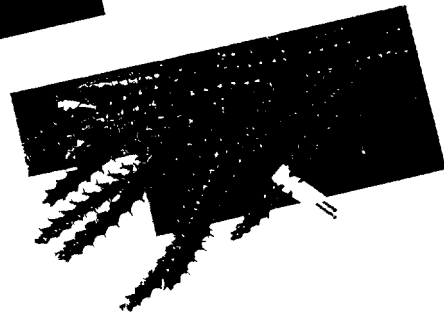

The flagship of the Dymo range with all its functions and combinations of typestyle, size and colour is still easy to use. A single stroke will give you a range of label combinations may whilst other machines may take up to ten

Labels with up to 4 lines of text, with bar codes, numbering and lettering on the same label, mixed printed colours, (e.g. Black and Blue printed on yellow tape) printed sizes, boxed or underlined

Whatever your needs, if you've got to name it, describe it, tag it or number it, if you need to file it, stock it or retrieve it easy Dymo 6000 will make it easy

Dymo 6000 the electronic labelmaker developed to meet and beat - the demands of high volume users with a simple key-stroke operating system and a large easy to read LCD screen, it's the most user-friendly labelmaker ever

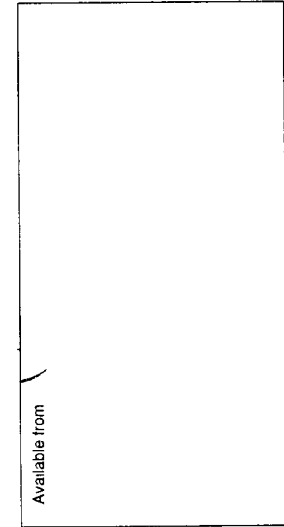

No matter how exacting your requirements, no matter how many you need, after only a few minutes practice you'll be creating labels that you never thought possible

Available from

Labels... at a stroke

Now there's a solution to those difficult high volume labelling problems - because now there's a powerful electronic labelmaker for especially labellers and businesses like yours... and it couldn't be easier to use.

DYMO 6000

ELECTRONIC LABELMAKER

DYMO 6000

is so flexible and easy to use because we designed it that way. To make it more flexible we gave it more functions. To make it the easiest to use we gave it a large user-friendly LCD display and a simple key operating system designed especially for business users. See for yourself. If your business needs complex or high volume labelling, the Dymo 6000 is simply the best machine you can buy.

Screen Display

The Dymo 6000's 60 character, 4 line LCD screen gives you the most user friendly display on the market. To make things even easier the 6000 utilises the 'WYSIWYG' principle - which means that in most cases, when you're making a label the screen displays exactly what you're doing in other words - What you see is what you get.

Large Keyboard

At 2/3 the size of a normal computer keyboard, it's light and portable enough to go anywhere you do. But big enough to let you hit just one key at a time!

Fixed Length

With Dymo 6000 you can specify the length of the label according to your requirements.

Peel Cut

Unique to the Dymo 6000, the message tape is automatically cut with an easy peel tab at the end. No more messing about and no need for long nails. You simply peel back the tab and apply your label.

Automatic Cut

Your Dymo 6000 is pre-programmed to automatically trim off your label once it's finished.

Sequential Numbering

Dymo 6000 will automatically increment up to, 96, 97, 98, 99 consecutive tapes by one each time.

Vertical Printing

Press the VERTICAL key and the Dymo 6000 prints labels vertically. Yes it's that easy, whilst other machines need 5 to 6 keystrokes.

Bar Code

Press the 'Barcode' key and you have all four barcode standards to choose from (EAN 8, EAN 13, UPC-A and UPC-E).

1-4 Line Messages

No need to print more than one label when you need more than one line. Your Dymo 6000 can print up to four lines of message on a single tape.

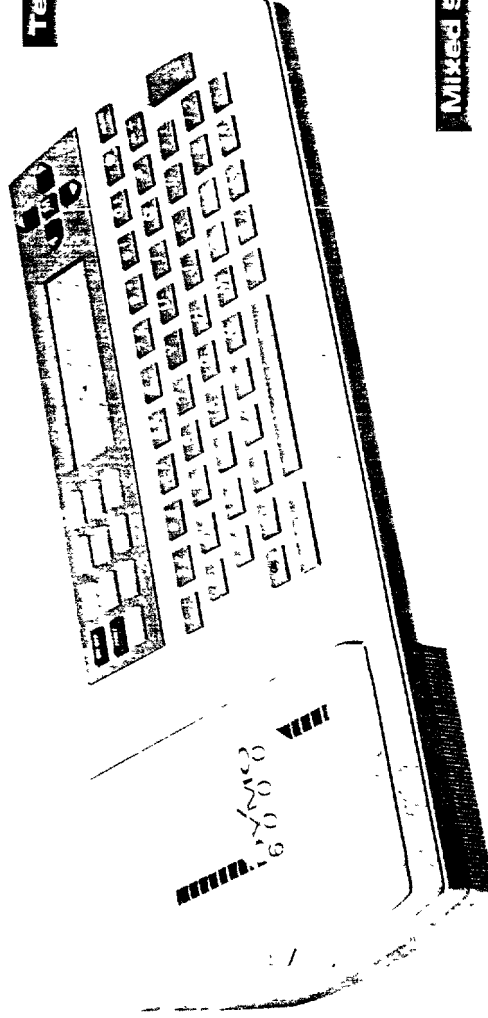

Text Alignment

It's easy to put your message exactly where you want it.

To the LEFT

To the CENTRE

To the RIGHT

Mixed Style/Size

Dymo 6000 lets you mix typesizes and sizes on the same label more easily than any other comparable machines. Eg.

Large Memory

Don't forget, Dymo 6000's huge 6000-character internal memory eliminates duplicated effort. Use recall or direct search to call-up previously stored messages.

Colour Combinations

Three ink-colour options and six tape colours means you have up to 18 possible colour combinations and less stock to hold e.g. (a total of 9 cassettes give 18 different combinations).

Tape Width

Choose from 6, 12 or 19mm widths to give you room to express yourself clearly.

DYMO 6000 THE ULTRA FRIENDLY MACHINE

Additional Functions!

- * Underline /
- * Multiple Copies

With all its functions and flexibility, with its powerful user-friendly operating system, you'd expect such a highly advanced machine to have a high price to match. But the amazing thing about the Dymo 6000 is that it's such good value. **We believe it is the best labelmaker that money can buy.**
