

μ A709C, μ A709M, μ A709AM GENERAL-PURPOSE OPERATIONAL AMPLIFIERS

SLOS096 – D942, FEBRUARY 1971 – REVISED MAY 1988

- **Common-Mode Input Range . . . ± 10 V Typical**
- **Designed to Be Interchangeable With Fairchild μ A709A, μ A709, and μ A709C**
- **Maximum Peak-to-Peak Output Voltage Swing . . . 28-V Typical With 15-V Supplies**

description

These circuits are general-purpose operational amplifiers, each having high-impedance differential inputs and a low-impedance output. Component matching, inherent with silicon monolithic circuit-fabrication techniques, produces an amplifier with low-drift and low-offset characteristics. Provisions are incorporated within the circuit whereby external components may be used to compensate the amplifier for stable operation under various feedback or load conditions. These amplifiers are particularly useful for applications requiring transfer or generation of linear or nonlinear functions.

The μ A709A circuit features improved offset characteristics, reduced input-current requirements, and lower power dissipation when compared to the μ A709 circuit. In addition, maximum values of the average temperature coefficients of offset voltage and current are specified for the μ A709A.

The μ A709C is characterized for operation from 0°C to 70°C. The μ A709AM and μ A709M are characterized for operation over the full military temperature range of –55°C to 125°C.

GENERAL-PURPOSE OPERATIONAL AMPLIFIERS

SLOS096 – D942, FEBRUARY 1971 – REVISED MAY 1988

schematic

Component values shown are nominal.

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

	uA709C	uA709M uA709AM	UNIT
Supply voltage, V_{CC+} (see Note 1)	18	18	V
Supply voltage, V_{CC-} (see Note 1)	-18	-18	V
Differential input voltage (see Note 2)	± 5	± 5	V
Input voltage (either input, see Notes 1 and 3)	± 10	± 10	V
Duration of output short circuit (see Note 4)	5	5	s
Continuous total power dissipation	See Dissipation Rating Table		
Operating free-air temperature range	0 to 70	-55 to 125	$^{\circ}\text{C}$
Storage temperature range	-65 to 150	-65 to 150	$^{\circ}\text{C}$
Lead temperature 1,6 mm (1/16 inch) from case for 60 seconds	J, JG, U, or W package	300	$^{\circ}\text{C}$
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	D or P package	260	$^{\circ}\text{C}$

NOTES: 1. All voltage values, unless otherwise noted, are with respect to the midpoint between V_{CC+} and V_{CC-} .
2. Differential voltages are at the noninverting input terminal with respect to the inverting input terminal.
3. The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 10 V, whichever is less.
4. The output may be shorted to ground or either power supply.

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

CERTAIN APPLICATIONS USING SEMICONDUCTOR PRODUCTS MAY INVOLVE POTENTIAL RISKS OF DEATH, PERSONAL INJURY, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE ("CRITICAL APPLICATIONS"). TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER'S RISK.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
